SECTION 8: WHAT'S NEW & FAQs

What's New in the Wholesale Product Guide V14	192
Tablet & Smartphone Use	193
FAQs	195

SECTION 1: MAINTENANCE & REPAIR

COOL RELIABILITY.

SUSTAINera
A/C Compressors

THE SUSTAINera REMAN ADVANTAGE

- The latest engineering upgrades are applied for maximum performance and **reliability**
- Designed to proprietary O.E. production specifications
- All wear items are replaced with 100% new O.E. components
- Precise balancing at both the component and core assembly levels guarantees optimal performance
- Extensive testing on compressor and turbine wheels for optimal functionality, endurance and **reliability** throughout the service life
- Competitively priced compared to new O.E. parts

Mopar® Reman is SUSTAINera Circular Economy.

SUSTAINera Circular Economy. It promises transparent, sustainable and affordable products without compromising quality, while working to preserve the environment through decreased waste and less use of our planet's resources.

MOPAR O.E. BRAKE COMPONENTS

MODEL-SPECIFIC FRICTION FORMULAS OFFER EXACT FIT AND SUPERIOR WEAR.

THE NITTY GRITTY ON BRAKE PADS

- ▶ Beveled – or “chamfered” – friction material edges to help eliminate vibration for smooth stops.
- ▶ Slotted pads to help get rid of heat for reduced fade and longer life.
- ▶ New noise damping insulators, shims and attaching hardware to help minimize brake squeal.
- ▶ Ceramic pads are formulated for high heat tolerance with little fade; and offer quiet and low-dusting braking performance.
- ▶ Semi-metallic pads are formulated for high heat absorption and consistent braking performance with excellent cold bite.

BUILT TO O.E. STANDARDS AND TESTED TOUGH FOR LONGER LIFE

- ▶ All friction materials meet **Mopar® engineering requirements**, including **dynamometer testing**, as well as demanding standards for wear, noise, vibration and dust.
- ▶ **Model-specific friction formulas are unique** and are designed and fine-tuned for weight distribution and driving dynamics of each vehicle application.
- ▶ O.E. Mopar Brakes are **tested and refined for maximum performance** in stopping distance, durability, noise, brake vibration, pedal feel, fade and drag, wheel dust and rotor wear.

The right choice for Chrysler, Dodge, Jeep® and Ram Brand vehicle repairs.

PERFORMANCE LOADED

SUSTAINera Semi-Loaded Brake Calipers

THE SUSTAINera REMAN ADVANTAGE

The SUSTAINera Semi-Loaded Calipers include the necessary brackets for installation. Brake pads are now sold separately. Options for both front and rear semi-loaded calipers available.

- O.E. quality built to FCA US specifications
- 100% tested for leaks – including computerized air-pressure leak testing
- Includes new rubber components and bushings
- Competitively priced

WHAT CAN YOU EXPECT FROM A REMAN CALIPER?

- Built strictly according to bills of materials
- Passed computerized air-pressure leak test
- Stamped with a date code for full product traceability
- Passed final inspection
- 100% tested for leaks
- Mandatory replacement parts:
 - Rubber components
 - Bushings

WHAT IS THE TEARDOWN/ CLEANING PROCESS?

1. Complete disassembly
2. High-pressure cleaning of bracket holes
3. Degreasing of castings
4. Shot-blasting
5. Wire-brushing of cavities
6. Chasing of threads

WHAT IS THE TESTING PROCESS?

PROPRIETARY PISTON MOVEMENT TEST

- Performed during assembly
- Ensures proper functioning pistons for every installation

COMPUTERIZED PRESSURE TEST

- Performed during assembly
- Confirms caliper is leak-free at installation

CORE INSPECTION PROCEDURE

- Go/No-Go inspection ensures no damaged cores are remanufactured

REMAN BRAKE CALIPERS (CON'T)

WHAT GOES INTO A REMAN CALIPER?

Bleeder Screw: Only new bleeder screws are used, securing a tight seal

Slide: Slider pins come pre-greased, ensuring proper caliper movement and brake system stability

Mounting Bracket Threads: Chased and inspected. Never worry about cross threading

Friction Ready: Indicates that the caliper has all the hardware and components except the brake pads

Brake Inlet: New banjo bolts and copper crush washers provided to assure proper seat on the brake inlet and caliper housing

Rubber Components: All rubber components are 100% replaced, assuring brakes perform at an optimum level

Pin Boots: New pin boots reduce the chance that moisture and contaminants will cause corrosion, which can affect caliper guide bolts and slide pins

WORN VS. REMAN CALIPERS — BEFORE AND AFTER

Mopar® Reman is SUSTAINera Circular Economy.

SUSTAINera Circular Economy. It promises transparent, sustainable and affordable products without compromising quality, while working to preserve the environment through decreased waste and less use of our planet's resources.

Updated November 2023

WE'RE NOT LIKE O.E. WE ARE O.E.

CLEANER AIR HAS NEVER BEEN MORE IMPORTANT.

THE **MOPAR**® ADVANTAGE.

Mopar® Cabin Air Filters keep up to 95% of particulates from entering the vehicle's cabin.

Mopar® Cabin Air Filters are designed to remove airborne particles to provide cleaner air in the passenger compartment, reduce allergy-related problems and improve the vehicle's heating and air-conditioning performance.

AVAILABLE MOPAR CABIN AIR FILTERS:

Particulate Filter	Activated Charcoal Filter
<ul style="list-style-type: none">▶ Filters small particles, dust and pollen before entering the cabin	<ul style="list-style-type: none">▶ Filters small particles, dust and pollen before entering the cabin▶ Gas absorption properties

WE'RE NOT LIKE O.E. WE ARE O.E.

MORE FUEL EFFICIENCY.

THE MOPAR® ADVANTAGE.

Mopar® Engine Air Filters provide improved fuel economy and performance.

Specially embossed paper pleats on Mopar® Engine Air Filters maximize airflow and dust-holding capabilities and provide consistent engine performance through low-flow resistance. The precise fit and seal of Mopar Engine Air Filters ensure only clean air reaches the engine.

MOPAR AIR FILTERS

Increase Fuel Efficiency

One of the biggest reasons to change the air filtersw regularly. Some studies indicate that replacing a dirty air filter increases fuel efficiency.

Reduce Emissions

Clogged air filters can reduce air flow to the engine - literally choking it - and as a result, affect the emission control systems of the car, causing an incorrect air-fuel mixture.

Prolong Engine Life

Changing the air filter regularly helps prolong engine life because the air filter is designed to trap damaging dirt and debris that can damage internal engine parts such as the cylinders and pistons.

WE'RE NOT LIKE O.E. WE ARE O.E.

FILTER OUT THE COMPETITION.

Mopar® Filters

When it comes to filters, Mopar® has your back. Mopar O.E. Filters keep your engine clean and lubricated and are engineered to the highest standards.

FCA US reserves the right to make changes at any time, without notice or obligation, to part numbers, prices and product availability.

THE MOPAR® ADVANTAGE.

- Feature a high-efficiency media that absorbs and traps dirt and solid particles
- Tested in accordance with standardized SAE and ISO test methods for use with synthetic and conventional motor oils
- Burst pressure exceeds 5x normal oil system operating pressure, ensuring leak-free performance

PROTECT ENGINES EFFECTIVELY

with Mopar® O.E. Filters.

FCA US reserves the right to make changes at any time, without notice or obligation, to part numbers, prices and product availability.

THE MOPAR® ADVANTAGE.

The aftermarket has an outdated oil filter that may be causing engine failure. These filters may bypass dirty oil into the clean oil gallery and put a vehicle's engine at risk. The next time you install an engine filter in a Ram Brand vehicle with a 3.0L V6 diesel engine, be sure to use an O.E. engineering-approved Mopar® Filter.

WHERE IS THE O-RING?

Check the location of your filter's O-ring to make sure your current filter meets O.E. specifications. Using the wrong filter can cause engine failure. Go with the original equipment by Mopar.

Mopar Part Number	Engine	Applications

WHY CHANCE A REPEAT REPAIR?

Mopar® Fuel Pumps

FCA US reserves the right to make changes at any time, without notice or obligation, to part numbers, prices and product availability.

THE MOPAR® ADVANTAGE.

Why use inferior parts that tie up your bay with comebacks? The right fuel pump can reduce contaminants and the load on a vehicle's electrical system. Choose from Mopar® O.E. or Reman to ensure quiet and efficient operation of fuel pump modules and peak performance of fuel injectors. It's the best way to keep vehicles running strong.

Not like the original part. It is the original part.

MOPAR® RADIATORS & A/C CONDENSERS

FOR PROPER FIT AND FUNCTION.

Mopar® Radiators and A/C Condensers are extreme weather tested and include enhanced design for extended durability. Hardware and installation procedures come with every part for hassle-free installation – saving you time and money with every repair.

GET THE MOPAR® ADVANTAGE FOR EVERY REPAIR

RADIATORS

- Heavy-duty tanks with reinforced ribs to prevent flexing and failure
- High-quality aluminum alloy core for optimum crimp strength and performance
- Premium-quality heavy-duty fittings and precisely engineered tube-to-header fit design
- Thermal gaskets and extreme weather tested for varying weather conditions
- Oil cooler designed for maximum cooling efficiency

A/C CONDENSERS

- Nitrogen leak tested to ensure a leak-free and damage-free condenser
- High-density fins designed for maximum cooling efficiency
- Designed with heavy gauge mounting brackets to reduce movement and vibration
- Manufactured with precise mounting holes and brackets to ensure ease of installation

SUSTAINera Reman Starters and Alternators.

SUSTAINera reman parts are O.E. quality built to FCA US specifications and consistently meet O.E. requirements for performance, durability and reliability. Customers will love the reliable performance and you'll love the quick turnaround time.

THE SUSTAINera REMAN ADVANTAGE

- Genuine Mopar® performance and a comprehensive offering at a great value
- Ability to offer quick service turnaround with a lower-cost replacement part
- Replacement of all critical components to guarantee optimal performance and durability
- Anti-corrosion coating to further increase part longevity

See next page for part numbers and vehicle applications.

Mopar® Reman is SUSTAINera Circular Economy.

The approach of our sustainable, comprehensive 360-degree program is reman, reuse, repair and recycle. We call it SUSTAINera Circular Economy. It promises transparent, sustainable and affordable products without compromising quality, while working to preserve the environment through decreased waste and less use of our planet's resources.

See how SUSTAINera is making a better future.

A BETTER FUTURE DEPENDS ON BIGGER THINKING.

Mopar® Reman is
SUSTAINera/Circular
Economy.

The approach of our sustainable, comprehensive 360-degree program is reman, reuse, repair and recycle. We call it SUSTAINera/Circular Economy. It promises transparent, sustainable and affordable products without compromising quality, while working to preserve the environment through decreased waste and less use of our planet's resources.

SUSTAINera/Circular Economy Remanufactured Steering Parts

Power Steering Pumps

- New O-rings with new premium-grade seals
- Surfaces on cam packs are micro-finished for durable, quiet operation
- Sealing surfaces are polished, restored and checked for micro-finish
- Full unit is tested for leaks and performance to O.E. specifications

Power Steering Gears

- New O-rings with new premium-grade seals
- Precision micro-finished valves are restored and utilize a dye penetrant inspection of the sector shaft, and valve assembly
- 100% new steel bearing balls
- Full unit is tested for leaks and performance to O.E. specifications
- Computerized functional test certification with serial number inscribed on each unit for complete manufacturing traceability

Rack & Pinion Gears

- New O-rings with new premium-grade seals
- All elastomer components are 100% replaced with new
- Racks are inspected using a dye penetrant method to ensure integrity
- Full unit is tested for leaks and performance to O.E. specifications
- Computerized functional test certification with serial number inscribed on each unit for complete manufacturing traceability

SUSTAINera/Circular Economy is continually **launching new steering parts** to provide high-quality remanufactured options for multiple applications.

MoparRepairConnect.com

ORIGINAL POWER REMANUFACTURED. NOT REIMAGINED.

Mopar® REMAN Engine Content Reference Guide.

When replacing an engine, most aftermarket manufacturers may quote a low price, but only Mopar® Remanufactured engines meet the stringent requirements to be called OEM. They'll fit and perform just like the original because they're remanufactured by the company that built them in the first place. Use this chart to ensure other aftermarket engines are priced right and include the same components that come included with the Mopar REMAN Long Block Engine.

Visit MoparRepairConnect.com for complete warranty details.

We stand behind every quality Mopar® Remanufactured Powertrain part we sell.

Peace of mind comes with the 3-Year/100,000-Mile Powertrain Limited Warranty for Mopar® remanufactured powertrains.

3 YEAR
100,000 MILE
POWERTRAIN LIMITED WARRANTY

Covers:

- ▶ Gas Engine Blocks and Heads
- ▶ Diesel Engine Blocks and Heads
- ▶ Transmissions/Transaxles
- ▶ Transfer Cases

2 YEAR
UNLIMITED MILES
BASIC LIMITED WARRANTY

Covers:

- ▶ Torque Converters
- ▶ Rebuild Kits

2 YEAR
100,000 MILE
NATIONWIDE LIMITED WARRANTY

Covers:

- ▶ Cummins Diesel
"Running Complete"
6.7L & 5.9L Engines

1 YEAR
UNLIMITED MILES
NATIONWIDE LIMITED WARRANTY

Covers:

- ▶ Cummins Diesel Long Blocks
- ▶ Cummins Diesel Short Blocks
- ▶ Cummins Diesel Cylinder Heads
- ▶ Cummins Diesel Engine Components

POWERTRAIN FLUID FILL INFORMATION

These charts below show the fluid fill levels for Mopar® Engines and Transmissions.

Mopar® Transmissions

VEHICLE	TRANSMISSION TYPE	NEW AND "RL" UNITS	REMANUFACTURED "R" UNITS
FRONT-WHEEL DRIVE VEHICLES			
Journey, Sebring, Avenger, Minivan, ProMaster 6-Speed	62TE	Partial	Residual
Journey, Sebring, Avenger, Minivan 4-Speed	40-41TE/TE	Partial	Residual
Caliber, Compass, Patriot Continuously Variable Transmission (CVT)	CVT	Partial	Partial
Dart, Compass, Patriot 6-Speed Automatic	6F24	Road Ready	Road Ready
FIAT® 500 Automatic	AS60T	Road Ready	Residual
Chrysler 200, New Cherokee 9-Speed	948TE	Road Ready	Road Ready
Dart, FIAT 500L, Alfa 4C, Renegade	DDCT (C635)	Residual	Pending Release
Minivan/Neon/FWD Passenger Car	31TH	N/A	Residual
Intrepid/Concord/300/300M	42LE	N/A	Residual

REAR-WHEEL DRIVE VEHICLES			
Chrysler 300, Charger, Challenger, Durango, Grand Cherokee, Ram 1500 8-Speed	845RE/8HP45-70-80-90	Road Ready	Road Ready
Chrysler 300, Charger, Challenger, Durango, Grand Cherokee, Wrangler 5-Speed	NAG1 (W5A580)	Road Ready	Residual
Durango, Grand Cherokee, Ram 1500, 2500, 3500 6-Speed	45-545-65-66RFE AS66RC	Rolls Ready	Residual
Ram 2500, 3500 6-Speed Diesel Engine	68RFE	Rolls Ready	Residual
Ram 3500, 4500, 5500 6-Speed Diesel Engine	AS69RC; AS68RC	Rolls Ready	Residual
RWD Van/Wrangler	32RH	N/A	Residual
D Trucks/Full Size Vans/Ram Trucks/Ram Vans/ Dakota/Grand Cherokee	42/44/46/47/48 RH-RE	N/A	Residual
LX/Wrangler/Liberty/Nitro/Dakota/Raider/ Durango/Ram/Commander	42RLE	Rolls Ready	Residual

It is the installer's responsibility to verify the transmission is filled to the correct level before delivering to the customer.

RELEASE DATE: 2/22

RESIDUAL

Fluid remaining after unit is drained.
Must add fluid after installation.

PARTIAL

Fluid added to a specified volume for test.
Must top off fluid after installation.

ROLLS READY

Fluid added to allow test at vehicle assembly plant.
Close to road ready. Must top off fluid after installation.

ROAD READY

Fluid at specified level for use in vehicle and to accommodate cooler line draining after transmission replacement.

Mopar® Engines

Running complete engines come with oil but blocks do not:

- Shortblocks O.E., Reman & RL = No oil
- Longblocks O.E., Reman & RL = No oil
- O.E. Running Complete Engines = With oil

AUTHENTIC TO THE CORE

SUSTAINera Reman 3.6L V6 Engine

THE SUSTAINera REMAN ADVANTAGE

- The latest engineering upgrades are applied to ensure optimal performance and reliability
- Designed to proprietary O.E. production specifications
- Every block, head and crankshaft is machined to rigid O.E. specifications
- All wear items are replaced with 100% new O.E. components
- Components are subjected to over 20 checks and tests on state-of-the-art test equipment
- Every engine is cold tested to validate the build
- Torque-to-turn, compression and oil pressure specifications are analyzed to ensure quality, lasting performance and reliability
- Designed to pass a 625-hour durability dyno test

3 YEAR
100,000 MILE
POWERTRAIN LIMITED WARRANTY

LEGENDARY POWER. TRUSTED PERFORMANCE.

Mopar® REMAN 6.7L Engine

THE MOPAR REMAN ADVANTAGE

Mopar® REMAN 6.7L Engines aren't just rebuilt – they're reborn with precision and power by Cummins.

- The latest engineering upgrades are applied to ensure optimal performance and **reliability**
- Developed to proprietary O.E. production specifications
- Every block, head and crankshaft is machined to rigid O.E. specifications
- All wear items are replaced with **100% new O.E. components**
- Components are subjected to over 20 checks and tests on state-of-the-art test equipment
- Every engine is cold tested to validate the build
- Torque-to-turn, compression and oil pressure specifications are analyzed to ensure quality, lasting performance and reliability
- Every Cummins 6.7L engine is remanufactured by Cummins in their facility for Mopar

**POWERTRAIN
NETWORK**

2 GIANTS TOGETHER BRINGING POWER TO YOUR BUSINESS

THE MOST EFFECTIVE DISTRIBUTION NETWORK OUT THERE

FCA US reserves the right to make changes at any time, without notice or obligation, to part numbers, prices and product availability.

THE MOPAR® POWERTRAIN NETWORK ADVANTAGE.

► **35 warehouses nationwide** stocked with Mopar® and SUSTAINera remanufactured powertrain products.

New investments for 2024:

30,000 feet in **Kansas City** for 2.4L and 3.2L engines!

15,000 feet added in **Minneapolis!**

10,000 feet added in **Chicago/Joliet!**

► Same-day delivery to **80% of the U.S.***

► **No-charge drop shipping** saving you time and money.

► **No-hassle** core returns.

► Policies to protect your investment, including our **open return policy** up to 2 years with no cost or charge for returns.

*Within a 50-mile radius of facing warehouse in the continental U.S.

DRIVING PERFORMANCE

SUSTAINera Reman 62TE Transmissions

THE **SUSTAINera** REMAN ADVANTAGE

Top 10 reasons the SUSTAINera Reman 62TE Transmission is the right choice.

When you choose a SUSTAINera Reman 62TE Transmission, you're getting all the latest engineering design improvements applied to ensure the most reliable performance out there. That means the SUSTAINera Reman 62TE Transmission isn't just an upgrade in comparison to what is available – it's better than the aftermarket.

- Upgraded front carrier from 3 to 4 planet design
- Upgraded low clutch retainer and seals to new design
- Upgraded compounder and transfer gear bearings, cones and cups
- Upgraded park guide cylinder to more robust design
- Differential pinion shaft retaining bracket replaced
- Additional torque converter bolts and replacement dowel pins included
- All valve bodies are 100% anodized and tested
- All solenoid assembly seals and springs are replaced and tested
- All SUSTAINera Reman 62TE Transmissions are end of line (EOL) tested – similar to FCA US production EOL test specifications
- Competitively priced and covered by the SUSTAINera 3-Year/100,000-Mile Powertrain Limited Warranty

3 YEAR
100,000 MILE
POWERTRAIN LIMITED WARRANTY

Mopar® Reman is SUSTAINera Circular Economy.

SUSTAINera Circular Economy. It promises transparent, sustainable and affordable products without compromising quality, while working to preserve the environment through decreased waste and less use of our planet's resources.

SHIFTING TO SUSTAINABILITY

SUSTAINera Reman 68RFE Transmissions

THE SUSTAINera REMAN ADVANTAGE

When you choose a SUSTAINera Reman 68RFE Transmission, you're getting all the latest engineering design improvements applied to ensure the most reliable performance out there. That means the Mopar® Reman 68RFE Transmission isn't just an upgrade in comparison to what is available — it's better than the aftermarket.

The SUSTAINera Reman 68RFE advantage.

The RFE transmission family started in 1999 and has stood the test of time by upgrading a four-speed transmission to the current six-speed transmission. The additional gears allow the unit to function at higher first gear ratio and tighter shift recovery from one gear to the next.

Hydraulic system upgrades include garage shift improvements to reduce rough start-up engagement, and transmission upshift and downshift improvements to reduce hesitation for better drivability and overall shift quality.

PERFORMANCE IS PRIORITY.

Mopar® REMAN Torque Converters

THE MOPAR REMAN ADVANTAGE

Every part is critical to the whole. That's why when you're replacing a torque converter on a Chrysler, Dodge, Jeep, or Ram Brand vehicle, it's important to choose O.E. parts.

- Superior balance
- Lock-up friction discs replaced 100% — never reclaimed
- Fiber washers replaced with needle bearings
- Impeller hubs always at current O.E. specifications
- Stator always completely disassembled and remanufactured with new springs and rollers
- Pistons always checked to ensure a "positive" taper
- 100% leak tested
- All components mechanically and chemically cleaned
- New bolts included where necessary
- No-hassle core return policy
- Tested in accordance with standardized SAE and ISO test methods for use with synthetic and conventional motor oils
- Burst pressure exceeds 5x normal oil system operating pressure, ensuring leak-free performance

Mopar® REMAN.

Mopar® REMAN Parts offer high-quality, affordable solutions without compromising performance. Each component is fully disassembled, inspected, tested and upgraded with the latest OEM technology to meet or exceed original specifications delivering proven reliability at a competitive price.

WE'RE NOT LIKE O.E. WE ARE O.E.

MOPAR® AUTOMATIC TRANSMISSION REBUILD KITS.

Rebuild the right way.

FCA US reserves the right to make changes at any time, without notice or obligation, to part numbers, prices and product availability.

SPECIFICALLY ENGINEERED FOR FCA VEHICLES.

Mopar® rebuild kits come with authentic O.E. components specifically engineered for FCA US LLC vehicle transmissions. They have everything you need for the chosen level of rebuild and are updated to the latest factory specs, so you know you're getting parts you can trust.

Choose from three levels of kits.

- ▶ **OVERHAUL KITS** contain all of the necessary gaskets, seals and filters for a specific transmission application. Based on the specific transmission being rebuilt, additional parts are included, such as snap rings, converter bolts, pump bolts, check balls, pistons, retainers, pump covers and more
- ▶ **BANNER KITS** include everything in the Overhaul Kits, plus friction plates
- ▶ **MASTER KITS** include all the parts in the Banner Kits, plus clutch separator plates

MODEL CODES

VEHICLE MODEL CODES 1978-2025 DOMESTIC PASSENGER CARS, MINIVANS AND TRUCKS

Vehicles are identified in this catalog by one or two character codes. The matrix below easily identifies codes by model year.

1990-2025 ALFA ROMEO, CHRYSLER, DODGE, JEEP®, RAM, FIAT®, PLYMOUTH

BODY CODE	VEHICLE MODEL
AA	Acclaim, LeBaron Sedan, Spirit
AB	Ram Van, Wagon (RWD)
AC	Dynasty, New Yorker Landau/Salon
AD	Ram Pickup, Ramcharger, Ram Cab & Chassis (RWD & 4WD)
AG	Daytona
AL	Horizon, Omni (through 1990)
AJ	LeBaron Coupe/Convertible
AN	Dakota Pickup, Dakota Cab & Chassis (RWD & 4WD)
AP	Shadow, Shadow Convertible, Sundance
AQ	Chrysler TC (by Maserati)
AS/NS/RS	Caravan, Grand Caravan, Town & Country, Voyager, Grand Voyager (FWD & AWD)
AY	Imperial, New Yorker, 5th Avenue
BA	FIAT® Spider (Conv)
BB	Monaco
BD	Laser, Talon
BE	Ram Quad Cab®
BR	Ram Pickup (RWD & 4WD)
BF	FIAT 500L (2014-2017)
BG	FIAT 500L (2018-2020)
BU	Jeep, Renegade (2015-2018)
BV	Jeep Renegade MCA (2019-2025)
B2	Colt
B3	Colt Vista (FWD & AWD)
B4	Ram 50, Power Ram 50 (RWD & 4WD)
B7	Stealth (FWD & AWD)
B8	Colt Vista (FWD & AWD)
B9	Colt, Summit
CS	Pacifica
CZ	Vista, Summit Wagon
D1	Reg & Quad Cab Pickup 3500
D2	Ram Pickup 3500
DA	Sterling Cab Chassis
DC	Reg & Quad Cab Chassis LD
DD	3500 Cab Chassis
DF	RAM 3500 <10K lb. Chassis
DH	Ram Reg & Quad Cab HD
DJ	2500 Reg Cab
DM	Reg & Quad Cab Chassis HD
DN	Durango
DP	4500/5500 Reg & Crew Cab
DR	Reg & Quad Cab Pickup
DS	Reg & Quad Cab Pickup
DT	Next Gen 1500
FB	FIAT 500X (2015-2018)
FD	FIAT 500X (2019-2023)
FG	FIAT 500E
FJ	Avenger, Sebring
FF	FIAT 500
GA	Alfa Romeo Giulia
GC	Alfa Romeo Tonale
GG	Dodge Hornet
GN	Atos
GR	Brisa
GU	Alfa Romeo Stelvio
HB	Durango
HG	Aspen
JA	Breeze, Cirrus, Stratus
JC	Journey
JF	FIAT Freemont

BODY CODE	VEHICLE MODEL
JJ	Jeep Avenger
JK	Jeep Wrangler (2007-2018)
JL	Next Gen Wrangler (2018-2025)
JR	Stratus, Sebring Sedan
JS	Sebring/Avenger
JT	Jeep Gladiator
JX	Sebring JXI Convertible
KA	Nitro
KK	Jeep Liberty (2008-2012)
KB	RAM 1200 Pickup (2024-2025)
KL	Jeep Cherokee
KJ	Jeep Liberty (2002-2007)
KM	Jeep Cherokee/Wagoneer S
LA	Challenger (2015-2023)
LB	Dodge Charger (2024-2025)
LC	Dodge Challenger (2008-2014)
LD	Charger (2011-2023)
LE	300, Magnum
LH	300M, Concorde, Intrepid, LHS, New Yorker, Vision
LX	300, Magnum, Charger
MK	Jeep Compass/Patriot
MP	Jeep Compass
ND	Dakota Pickup
NM	MMC Raider
NS	Caravan, Voyager, Town & Country, Limited
N4	Ram Rampage
N7	Ram 700
PF	Dart
PL	Neon
PM	Caliber
PR	Prowler
PT	PT Cruiser
RG	Minivan
RM	Volkswagen Routan
RS	Caravan/Voyager/Town & Country (2001-2007)
RT	Caravan/Voyager/Town & Country (2008-2020)
RU	Chrysler Pacifica, Voyager
RY	Chrysler Atlantic
SR	Viper GTS Coupe, Viper RT/10 Roadster
ST	Sebring Coupe, Stratus Coupe
TA	Attitude
TC	Dodge Journey
TJ	Jeep Wrangler
UF	Chrysler 200
VA	Sprinter
VB	Sprinter
VF	Ram ProMaster®
VM	Ram ProMaster City®
WD	Durango
WJ	Jeep Grand Cherokee (1999-2004)
WK	Jeep Grand Cherokee (2005-2022)
WL	Jeep Grand Cherokee (2021-2025)
WS	Jeep Wagoneer, Grand Wagoneer
XJ	Jeep Cherokee
XK	Jeep Commander
ZB	Viper SRT10®
ZD	Viper
ZH	Crossfire
4C	Alfa Romeo 4C

Engine Sales Code Chart

The Body Code Plate contains the specific sales codes of components used in the particular vehicle. This information is useful to the technician to identify the vehicle's engine and transmission. By comparing the sales codes for engines and transmissions from the Body Code Plate with the sales codes provided below, you can more accurately identify the correct replacement parts. Refer to the applicable service manual for Body Code Plate location and decoding.

Sales Code	Engine Name
EAB	1.4L I4 MULTIAIR 16V ENGINE

SPEAK THE SAME LANGUAGE AS YOUR REPAIR FACILITY

When faced with a major powertrain breakdown, your parts choices are extremely important. Here are a few key terms used by industry professionals regarding the repair or replacement of major vehicle components such as engines and transmissions.

CRITERIA	MOPAR® O.E. PARTS	MOPAR REMAN PARTS	MOPAR SUSTAINera REUSE	AFTERMARKET REMAN PARTS	REPAIR PARTS	SALVAGE / JUNKYARD PARTS
Warranty included	✓ O.E.M. Powertrain Warranty (3 years/100,000 miles)	✓ O.E.M. Powertrain Warranty (3 years/100,000 miles)	✓ (6 months)	✓ (Limited)	✓ (Limited)	○
Meets O.E. specifications (fit and quality)	✓	✓	✓	-	○	✓
Includes OEM upgrades / supersessions	✓	✓	✓	-	-	-
Pre-shipment review / inspection	✓	✓	✓	○	-	-
Original part retained	✓	✓	-	-	✓	-
OEM managed reman process	✓	✓	-	-	-	-
100% new mandatory replacement parts used in reman steps	✓	✓	-	-	-	-
Helps maintain resale value	✓	✓	✓	-	-	-
Direct delivery to repair facility	✓	✓	✓	-	-	-
Legend: ✓ = Yes ○ = Varies / Limited - = No						

Glossary of Terms

O.E. and OEM: Original equipment (the same parts your vehicle was built with from the manufacturer). OEM stands for original equipment manufacturer (engineers, facilities, testing equipment, upgrades from the vehicle manufacturer).

Mopar REMAN (O.E.): Remanufacturing overseen by OEM engineers; restored to O.E. specifications with required new parts and potential O.E. upgrades; backed by 3-year/100,000-mile Powertrain Limited Warranty; delivered directly to the repair facility.

Aftermarket REMAN: May not follow an industrialized process; not to O.E. specs (may be reverse engineered); may use used or aftermarket parts; typically has a limited warranty.

Rebuilt / Repair: Original part is kept and repaired or rebuilt either inside or outside the vehicle. Only failed components are addressed; no standard specs; typically has a limited warranty.

Mopar SUSTAINera REUSE: Genuine O.E. parts with O.E. fit/quality; pre-shipment review; 6-month warranty. A sustainable and cost-effective option using O.E. parts from retired/damaged vehicles.

Salvage/Junkyard: Replacement part with unknown maintenance/accident/rebuild history; warranty may be absent or cost extra.

WE SELL MOPAR® POWERTRAIN! SAME- OR NEXT-DAY DROP SHIP DELIVERY.

Mopar® Powertrain Units can be drop-shipped nationwide,
with 80% of the country receiving same- or next-day delivery from
the Mopar Powertrain Network of 35 distribution centers.

THE MOPAR. ADVANTAGE

- Choose from O.E. and remanufactured options
- Fast availability and drop ship included
- No-hassle core returns – catastrophic failures accepted
- No fleet or commercial restrictions
- Remanufactured to O.E. specs (never rebuilt)
- Includes reman updates with the latest factory upgrades and enhancements
- Warranty labor reimbursement

Re-Power Fast.

3 Solutions That Get Your Cummins-Powered Truck Back to Work.

The SUSTAINera Cummins Diesel Advantage.

The Genuine Difference

Cummins Reman products are not simply repaired or rebuilt; they are remanufactured in state-of-the-art factories that use internationally recognized quality certification standards such as ISO 9001 and ISO 16949. The Cummins remanufacturing process begins with complete disassembly of every part, down to the last spring, nut and bolt.

Parts are cleaned using nonabrasive cleaning methods and undergo extensive testing to ensure that they meet quality standards for reuse in the remanufacturing process. Parts that do not meet Cummins factory standards are replaced with new Genuine Cummins parts, and every single Cummins Turbo Diesel 5.9L and 6.7L Reman gets all-new pistons, rings, gaskets and bearings — among other items. Major castings such as heads, blocks and crankshafts are carefully examined, and only the pieces that meet

stringent salvage requirements are chosen to be re-machined and used to build Reman engines. Individual components are tested prior to assembly and complete assemblies must pass rigorous quality tests before they can be sold to our customers.

Reman Engines

Remanufactured to exacting standards and built on assembly lines, these drop-in engines include the latest improvements in design and material, and every single unit is hot tested to ensure performance and quality. Engines are restored to Cummins factory specifications and are backed by the best warranty in the industry. Engine replacement generally takes only a couple of days — from diagnosis to completion — getting trucks back to work fast. Cummins Reman engines also provide greater value through better fuel efficiency, lower maintenance costs and lower emissions than a typical repaired engine, and substantially better potential resale price of the vehicle.

Long Blocks

In situations where many of the customer's components are still viable, a Reman long block can be an attractive alternative. Built to the same standards as Reman engines, the long block option allows reuse of external components such as the turbo, lift pump, wiring harness, fuel pump and fuel lines.

Short Blocks

In the event that an engine block shows extensive wear or significant damage, a short block is a great option. Short blocks include the cylinder block, crankshaft, pistons, connecting rods/bearings, seals and fasteners. This option allows for the maximum reuse of parts including the cylinder head.

MoparRepairConnect.com

Cummins Engines - What's Included

Component	Reman Short Block	Reman Long Block	Reman Complete
Camshaft	Included	Included	Included
Connecting Rods, Main, Thurst Bearings	Included	Included	Included

Starter & Alternator	Optional	Optional	Optional

Included = Parts are included in the solution.

Optional = Parts not included but can be purchased to replace.

Reuse = Parts not included; parts are inspected, cleaned and re-used from old engine if they pass inspection.

Sample list only; actual part content may vary by engine part number and by service provider recommendation.

*For 2019 and newer, included

**Reman Long Blocks not available for 2019 and newer model years at this time

***Reuse wiring harness on 5.9L running complete engines

Updated 10/2023

Mopar® Reman is SUSTAINera Circular Economy.

The approach of our sustainable, comprehensive 360-degree program is reman, reuse, repair and recycle. We call it SUSTAINera Circular Economy. It promises transparent, sustainable and affordable products without compromising quality, while working to preserve the environment through decreased waste and less use of our planet's resources.

MAXIMIZED PRECISION.

Mopar® Cummins REMAN Fuel Injectors

THE MOPAR REMAN ADVANTAGE

- O.E. remanufactured injectors (not aftermarket remans)
- Built to original O.E. specifications with O.E. components
- Completely disassembled and cleaned
- 100% requalified to O.E. specifications or replaced
- Barrels matched to tight tolerances
- Precise calibration guarantees accuracy
- Peak performance and improved fuel economy
- 1-Year/Unlimited-Mileage Limited Warranty with no commercial exclusions
- Available in bundles of six

SECTION 3: COLLISION

ACCIDENTS HAPPEN.

WHAT YOU NEED TO KNOW BEFORE AND AFTER.

CALL THE FCA US LLC CERTIFIED COLLISION EXPERTS:

PREPARE AND PROTECT

No one has an accident on purpose.

But not having the proper knowledge to protect yourself and your vehicle if an accident occurs is a matter of choice. This brochure contains the information you need to safeguard your most precious cargo before an accident and after one occurs.

TABLE OF CONTENTS

Accident Prevention and Protection.....	2 - 3
Collision Repair	4 - 5
Understanding Collision Parts.....	6
Mopar® OEM Parts	7 - 9

BEFORE AN ACCIDENT: PREPARE AND PROTECT

Choose the Proper Safety Features

Vehicle technology is increasingly more advanced with every vehicle model year, especially in areas of safety. The standard and available features that come with your vehicle work toward accident avoidance and injury protection.

Advances in safety features include electronic stability control¹, high-strength structures, airbags², and crash avoidance 360-degree sensors that help keep you in your lane³, help you park³ and more.

When you choose your vehicle and trim level, look carefully at the standard and available safety features it offers and opt for those that make the most sense for you.

YOUR BEST LINE OF DEFENSE: Stay alert and always fasten your seatbelt.⁴

Select the Right Insurance Policy

There are many factors that weigh in when choosing the right insurance coverage. It's important to remember that cost is not the only factor in the selection. Two items often overlooked are:

- 1. Where the vehicle is sent for a repair**
- 2. The parts covered for use in the repair process**

Be certain your policy covers the use of Original Equipment (O.E.) parts.

ABOUT ORIGINAL EQUIPMENT

Original Equipment (O.E.) or Original Equipment Manufacturer (OEM) parts are parts from the vehicle manufacturer. Your vehicle and its components are built as a complete safety system. Every part is built to FCA US proprietary specifications, tested and proven to fit perfectly and seamlessly with all vehicle parts, systems and sensors.

Mopar. Parts are O.E. parts for Chrysler, Dodge, Jeep, Ram and SRT® vehicles.

Note your location: _____

Describe the incident: _____

IN CASE OF AN ACCIDENT

Retain this form to capture pertinent data in the event of an accident. This content is also available via the complimentary **Mopar® Companion App** in the “Your Garage, Document an Accident” section.

RECORD THE DETAILS

Date and time of the occurrence: ____/____/____ ____:____ a.m. or p.m.

RECORD THE OTHER DRIVER'S INFORMATION:

Full name: _____

Address: _____

License plate number: _____

Driver's license/ID number: _____

Insurance information: _____

Take care of yourself and others first. If you or someone else is injured, call 911.

AFTER AN ACCIDENT: WHAT YOU NEED TO KNOW

Find an FCA US Certified Collision Repair Shop

Proper collision repair requires certified specialists with the advanced tools and technology to get the job done right. Not every body shop is created equal, which is why it's of the utmost importance that you choose your repair shop carefully.

FCA US Certified Body Shops must pass rigorous testing on the following key requirements, so you can be confident in their people, technologies and the quality of the repair and service you'll receive:

- Advanced capabilities
- Technical expertise
- Regulatory compliance
- Strength and longevity of business
- Exceptional customer service practices

It's easy to find your nearest FCA US Certified Body Shop. Just ask your FCA US dealer or find a location via the Mopar Owners Companion app, available for most mobile devices.

Understand the Repair Process

Let's say you were an uninformed consumer involved in an accident, you might call the insurance company, go to the body shop they recommended and unknowingly have your vehicle repaired with non-OEM parts.

That's how the process goes for many people.

But not you. Not anymore.

For you, an informed customer, the process may go like this:

- You call your insurance agent to file a claim
- The vehicle goes to the collision shop of your choice
- You tell the repair facility you want the vehicle repaired with Mopar® OEM parts
- The repair facility calls the insurance company
- Payment is handled between the collision shop and the insurance company

REMEMBER: You have the right to choose a collision shop and the parts they use.

UNDERSTANDING COLLISION PARTS

Not All Parts are Created Equal

You may encounter these terms on your estimate.

Original Equipment (O.E.) parts or Original Equipment Manufacturer (OEM) parts are parts from the vehicle manufacturer. Mopar® Parts are O.E. parts for Chrysler, Dodge, Jeep®, Ram and SRT® vehicles.

Your vehicle and its components are tested rigorously as a complete safety system. Every part is built to FCA US proprietary specifications, tested and proven to fit perfectly and seamlessly with all vehicle parts, systems and sensors.

Aftermarket Parts: These are new parts made by non-FCA suppliers. They are made to 'fit' several makes and model vehicles, but not your specific make, model and year vehicle. They are often ill-fitting and do not stand up to wear and tear.

Salvage Parts (Salvage/Used/LKQ/Recycled):

Exactly as they sound, salvage parts are salvaged from scrap yards. They raise major quality concerns because their origin and past are unknown. These parts are typically not warranted.

Knowing the difference between these parts and approving the type of parts used on your vehicle can lead to a better overall repair experience. And choosing Mopar OEM parts makes it possible to return your vehicle to the same specifications as when the vehicle was new.

IMPORTANT: Make sure you specify your parts preference before the repairs begin.

MOPAR® OEM PARTS

The Importance of Mopar® Parts

Mopar® OEM parts are proven to fit and perform to original vehicle specifications. While cosmetically this is important, the importance of Mopar Parts goes much deeper. Using Mopar Parts can be very critical to the structure and safety of the vehicle, even in areas where you might not think it matters.

FASCIAS

Must fit precisely for safety systems to work properly. Mopar Parts fit and wear to exact specifications for the vehicle.

GLASS

Windshields provide nearly one-third of roof strength, passenger airbags² rely on them for proper deployment, collision avoidance cameras need to see accurately through them, and they can protect from wind noise. Mopar glass checks all the boxes and fits according to engineering specifications for the vehicle.

SHEET METAL

Sheet metal parts like hoods and quarter panels are integral to chassis structure and safety designs. Only Mopar Parts fit and resist corrosion to the same standard as when the vehicle did when it was new.

LIGHTING

Aftermarket lights often have inferior assemblies, improper alignment, defective seals or may prematurely yellow. Mopar lighting systems do not have these problems.

MIRRORS

Mopar mirrors work with convenience features like heaters, retractors and remote adjustment, proprietary crash avoidance and lane departure³ systems.

7

MOPAR VS. AFTERMARKET AT A GLANCE

AUTHENTIC MOPAR COLLISION PARTS

- Attach to the structure as designed and intended
- Won't create unintended bulges, seams or gaps
- Are designed to structurally support all safety systems
- Are corrosion resistant
- Help your vehicle retain its value (keep your records!)
- Are fully backed by the Mopar Collision Replacement Parts Lifetime Limited Warranty⁵

AFTERMARKET COLLISION PARTS

- Often require drilling/welding and bending to make them fit, weakening the part
- May have noticeable bulges and gaps
- Often require manipulation to work with vehicle components
- Corrosion resistance may vary
- May depreciate the value of the vehicle
- May or may not have a warranty; [read the fine print for exclusions!](#)

A Case Study on Aftermarket Parts

Mopar, subjected an aftermarket fender to dimensional testing, comparing it to Mopar design specifications. Three-dimensional measurements were taken at key points. Next, they were subjected to white light scans, which showed deviations from FCA US LLC design specifications as indicated by color.

Green is optimal, dark blue areas are lower than spec, dark red areas are higher than spec.

Dimensional standards failed at 35 of 60 points checked. That's a 58% failure rate.

The aftermarket fender didn't measure up:

1. Upper Fender Attachment – Poor fit requiring adjustments
2. Upper Half of Fender Low Spots – Poor/wavy appearance
3. Catwalk (Upper Edge) – Poor hood to fender fit
4. Upper Mounting Hole – Poor fender to door fit – potential wind noise
5. Attachment Tab High – Poor fit requiring adjustments to fit fascia

Subpar Structure

Seeing is believing, so Mopar® performed a 12-week corrosion test on a Mopar fender and an aftermarket fender to prove the Mopar benefits. Both fenders were scratched and exposed to extreme conditions designed to simulate five years of exposure to snow, humidity, salt and fog. The results undeniably show the durability and integrity of the Mopar fender.

MOPAR. FENDER

The Mopar fender over 100+ days after testing completion

AFTERMARKET FENDER

The aftermarket fender over 100+ days after testing completion

**Don't gamble on parts that are proven inferior.
Choose Mopar Parts for your FCA US vehicle.**

HELPFUL RESOURCES

- Mopar.com (Collision Assistance)
- Mopar, Owner's Companion App

1. No system can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions.

2. The advanced front airbags in this vehicle are certified to the federal regulations for advanced airbags. Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front airbag. All occupants should always wear their lap and shoulder belts properly.

3. This is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of his/her surroundings and be prepared to take corrective action to avoid collisions.

4. Always wear seatbelt and obey traffic laws. The safest place for children 12 and under is in the rear seat.

5. See dealer for complete warranty details.

MOPAR® RADIATORS & A/C CONDENSERS

FOR PROPER FIT AND FUNCTION.

Mopar® Radiators and A/C Condensers are extreme weather tested and include enhanced design for extended durability. Hardware and installation procedures come with every part for hassle-free installation – saving you time and money with every repair.

GET THE MOPAR® ADVANTAGE FOR EVERY REPAIR

RADIATORS

- Heavy-duty tanks with reinforced ribs to prevent flexing and failure
- High-quality aluminum alloy core for optimum crimp strength and performance
- Premium-quality heavy-duty fittings and precisely engineered tube-to-header fit design
- Thermal gaskets and extreme weather tested for varying weather conditions
- Oil cooler designed for maximum cooling efficiency

A/C CONDENSERS

- Nitrogen leak tested to ensure a leak-free and damage-free condenser
- High-density fins designed for maximum cooling efficiency
- Designed with heavy gauge mounting brackets to reduce movement and vibration
- Manufactured with precise mounting holes and brackets to ensure ease of installation

Call us for all your cooling system needs!

- Electrical & Mechanical Fans
- Water Pumps
- Fan Clutches
- Radiator & Heater Hoses

AUTHENTIC MOPAR® GLASS REPLACEMENT POSITION STATEMENT

Only Authentic Mopar® Glass is designed, engineered, manufactured and tested to the FCA US LLC internal and government-mandated standards and is the only equivalent to the originally installed glass.

FCA US LLC does not approve of or recognize glass replacement procedures where Authentic Mopar Parts are not used for Chrysler, Dodge, Jeep®, Ram and FIAT® brand vehicles. Any repairs performed not using Mopar Replacement Glass, and not following published repair guidelines and procedures, may expose current or future vehicle owners and occupants to unnecessary risk. FCA US LLC vehicles, systems and components are engineered, tested and manufactured to help protect vehicle occupants. They are engineered based upon both government-mandated and internal corporate requirements relative to Durability, Noise Vibration & Harshness (NVH) and Vehicle Safety.

Authentic Mopar Glass characteristics include and are not limited to:

- ▶ Glass coatings that provide UV protection and in-cabin heat reduction. Aftermarket variants often may not be equipped with reflective technology. This technology optimizes air conditioning performance and can improve fuel economy. The attached moldings have been validated with exposure testing, including UV, chemical, temperature, tear and abrasion resistance.
- ▶ Glass may be equipped with enhanced acoustic dampening technologies integrated into the glass assembly. Aftermarket glass may not be equipped with this variant, which may result in increased wind, road and engine noise in your vehicle's cabin.
- ▶ Works with various advanced driver safety system electrical components, including cameras, rain sensors, antennae and heating elements. Aftermarket glass may not support the function of complex electrical components and could interfere with your vehicle's electronic systems, resulting in unintended functions or disabling the system function.
- ▶ If your vehicle's windshield is equipped with a forward facing camera (typically integrated in the rearview mirror assembly), the camera must be recalibrated after the windshield has been installed.

Glass components are also often a part of the vehicle's structural assembly. Using Mopar authorized removal and replacement procedures, including the use of advanced adhesives specific to each model, helps ensure that the vehicle remains as designed.

Aftermarket glass manufacturers may represent their products as Original Equipment Equivalent, or OEE. No supplier is authorized to utilize FCA US LLC tooling, test equipment or Intellectual Property in the development or production of aftermarket glass. Aftermarket windshields and moldings are often made with materials that do not adhere to FCA US LLC performance standards.

COLLISION BULLETIN

NUMBER:

31-001-14

GROUP:

Collision Bulletin

DATE:

June 19, 2014

This bulletin is supplied as technical information only and is not an authorization for repair. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying or otherwise, without written permission of FCA US LLC.

SUBJECT: Carbon Fiber Monocoque Repairs

MODELS: 2015 Alfa Romeo 4C

CARBON FIBER MONOCOQUE REPAIRS:

Due to the technologically advanced design of the carbon fiber monocoque, it is recommended that all repairs be performed by a qualified technician that specializes in performing carbon fiber structural repairs.

NOTE: Abaris Training is a company that has qualified carbon fiber repair technicians on staff available to perform on-site monocoque service repairs. This service is called the Flying Doctor Program. Abaris can be contacted at 775-827-6568 if this service is required. They will ask many questions and request photographs to assess the damage and provide repair costs for the Flying Doctor services.

FAILURE CODE: Information Only

OPT OE POSITION STATEMENT

Opt OE is not OE

Opt OE parts can seem like authentic Mopar, at a value price compared to purchasing from an FCA dealer. However, Opt OE is not OE, and can create problems for collision shops and vehicle owners.

What is Opt OE?

Opt OE refers to Option OE, and may also be referred to as surplus or OE -supplier. These parts may not come from an FCA dealer and may not be manufactured to meet the same high standards as the original part. Only Authentic Mopar® OE parts are designed, engineered, manufactured and tested to the FCA US LLC internal and government-mandated standards and are the only equivalent to the originally installed components. Even though parts classified as Opt OE may appear in various estimating systems or parts ordering documentation, there is no guarantee that they are genuine Mopar parts.

Our Stance:

Mopar does not have an Opt OE program or an OE surplus program and does not recognize the sale of Opt OE parts. Often, these parts are imported from other markets where vehicle content, safety standards, and appearance may differ as compared to North America. In other cases, Opt OE parts may be manufactured by OE suppliers. It is important to know that no supplier is authorized to utilize FCA US LLC tooling, test equipment or Intellectual Property in the development or production of aftermarket parts. Even when offered by OE suppliers, aftermarket parts are often made with materials and processes that do not adhere to FCA US LLC standards.

FCA US LLC does not approve of, or recognize, repair procedures where Authentic Mopar Parts are not used for Chrysler, Dodge, Jeep®, Ram and FIAT® brand vehicles. Due to the complex safety systems engineered into modern vehicles, these parts may not function properly and may disable or impair the function of critical safety devices. In addition, they may not fit properly or match the finishes used on the original components. This can result in unsafe or poor quality repairs, lost productivity, and future warranty concerns for collision shops.

For more information, log on to: www.MoparRepairConnect.com.

RECONDITIONED WHEEL USAGE

FCA US LLC POSITION

FCA US LLC does not recommend that customers use “reconditioned” wheels (wheels that have been damaged and repaired) because they can result in a sudden catastrophic wheel failure that could cause loss of control and result in injury or death.

For clarification:

- Cosmetic refinishing for the purpose of repairing a superficial flaw is an acceptable procedure providing it is limited to paint or clear coat only, the wheel is not modified in any way and there is no exposure to paint curing heat over 200 degrees Fahrenheit.
- “Damaged” wheels have been bent, broken, cracked or sustained some other physical damage that may have compromised the wheel structure.
- “Repaired” indicates that the wheel has been modified through bending, welding, heating, straightening or material removal to rectify damage.
- Replating of chrome-plated wheels, or chrome plating of original equipment painted or polished wheels is not an acceptable procedure as this may alter mechanical properties and affect fatigue life. Additionally, the FCA US LLC Global Warranty Administration does not allow refinishing of wheels under warranty.

This statement supersedes any previously released information by FCA US LLC.

Release Date: August 11, 2010

For more information, log on to: www.MoparRepairConnection.com.

REPAIR PARTS USED FOR STRUCTURAL REPAIRS POSITION STATEMENT

This bulletin supersedes Service Bulletin 3100211, dated November 10, 2011, which should be removed from your files. This is a complete revision and no asterisks have been used to highlight revisions.

FCA US LLC vehicles, systems and components are engineered, tested and manufactured to protect vehicle occupants based upon both government-mandated and internal corporate requirements relative to durability, NVH (noise/vibration/harshness), occupant protection and vehicle safety. The overall structural integrity of the vehicle is dependent on its inherent design specifications. Sheet metal and glass are critical elements in the design of specific crush zones that allow the energy of a collision to be absorbed in a predictable way and maximize the effectiveness of the restraint system to protect the occupants. The use of parts not specifically designed and tested by FCA US LLC may compromise the integral balance between these safety systems. Only Authentic Mopar® Repair Parts and glass are designed, engineered, manufactured and tested to FCA US LLC internal and government-mandated standards and are the only ones equivalent to the originally installed parts. FCA US LLC does not approve of or recognize structural repair procedures where Authentic Mopar Parts are not used for Chrysler, Dodge, Jeep® and Ram Brand vehicles. Any repairs performed not using Mopar Parts, and not following published repair guidelines and procedures, may expose current or future vehicle owners and occupants to unnecessary risk. When restoring a collision-damaged vehicle to pre-loss condition, consideration must be given to the following:

- ▶ All structural distortion has been identified and corrected using appropriate structural straightening equipment ("frame rack") and a three-dimensional measuring system.
- ▶ All damaged panels have been repaired or replaced.
- ▶ All replaced panels provide the as-built structural equivalence and corrosion protection of the original panels.
- ▶ Unless partial replacement procedures are documented in an FCA US LLC publication, structural panels must be installed in their entirety; partial replacement or "sectioning" of panels may compromise vehicle structure.
- ▶ FCA US LLC strictly prohibits the collision repair process of "clipping", the general practice of clipping would include the sectioning of multiple vehicles at the A-pillar, floor, rocker panel and other locations which contain advanced high-strength steel reinforcements. These panels must be replaced at the factory seams when applicable. Risk of improper repair is significant and is not a supported practice.
- ▶ FCA US LLC does not support the use or reuse of any structural component which has been removed from a vehicle previously damaged, flooded, burned, scrapped or removed from use for any other reason commonly referred to as "salvage parts."
- ▶ While some salvage parts may "appear" equivalent, there can be dramatic differences in the design and functional characteristics which cannot be determined by a visual inspection and which could have a negative effect on the vehicle occupants in a future collision event.
- ▶ Salvage components may have been affected by crash impact loads, incorrect, improper or inadequate disassembly and removal procedures, weathering or environmental exposure outside of that expected during normal use.
- ▶ Salvage components are not traceable should a component recall be required in the future. This statement supersedes any previously released information by FCA US LLC. For more information, log on to <https://www.MoparRepairConnect.com>.

FCA US LLC vehicle lease agreements specify that ONLY Genuine FCA US LLC replacement parts be utilized for collision repairs to the vehicle.

Release Date: November 20, 2019

For more information, log on to: www.MoparRepairConnect.com.

REPLACEMENT SEAT COVERS AND SEAT COVER REPAIRS

FCA US LLC POSITION

FCA US LLC vehicles, systems and components are engineered, tested and manufactured to help protect vehicle occupants based on government-mandated and internal corporate requirements relative to durability, noise vibration and harshness, occupant protection and vehicle safety.

Supplemental seat-mounted side air bags provide enhanced protection for an occupant during a side impact. When the seat-mounted side air bag deploys, it opens the seam between the front and side of the seat's trim cover. Modifications to the seat system, including the seat cover, may change the way the air bag deploys, which could adversely affect the performance of the supplemental seat-mounted side air bag, causing serious injury. "Modifications" include:

- Any change to the seat back cover such as material, thread, stitch design and alterations or misplacement of the features that guide the deploying air bag into position.
- Any nonapproved seat cover replacements.

Only Authentic Mopar® Repair Parts, and approved Mopar Accessories such as Katzkin® leather seat covers, are designed, engineered, manufactured and tested to the FCA US LLC internal and government-mandated standards. The use of parts not specifically designed and tested by FCA US LLC may compromise the integral balance between these safety systems.

FCA US LLC only approves of repairs or modifications to the supplemental seat-mounted side air bag system, including the seat system or seat cover, where Authentic Mopar Repair Parts or Mopar Accessories are used for Chrysler, Dodge, Jeep®, Ram and FIAT® Brand vehicles. Any unapproved repairs or modifications performed not using Mopar Parts or not following FCA US LLC approved published repair guidelines and procedures may increase the risk of injury to current or future vehicle owners and occupants.

This statement supersedes any previously released information by FCA US LLC.

Release Date: June 21, 2011

SCAN TOOL POSITION STATEMENT

FCA US LLC vehicles, systems and components are engineered, tested and manufactured to help protect vehicle occupants. They are engineered to meet or exceed both government-mandated and internal corporate requirements relative to durability, NVH (noise vibration and harshness) and vehicle safety. Use of the Mopar® wiTECH vehicle diagnostic tester (Mopar Scan Tool) is an important part of FCA US vehicle service and maintenance. This tool contains software that aftermarket tools may not contain and can assess whether any FCA US vehicle's safety and security systems contain active or stored Diagnostic Trouble Codes (DTCs).

Safety and security-related systems, such as antilock brakes, supplemental restraint systems (SRS – air bags), occupant restraint controller (ORC), seat belts, active head restraints, forward facing camera and radar, blind spot monitoring, and other automated electronic driver assistance systems, **MUST** be tested for fault codes (DTCs) that could be active (current) or stored following a collision. Use of the Mopar wiTECH vehicle diagnostic tester is necessary before and after collision repair.

ANY of the following conditions could trigger DTCs prior to or during collision repairs, which could result in improper vehicle performance:

- Vehicle is involved in an accident or collision, even though the damage may appear minor
- Vehicle has been in an accident with or without air bag deployment
- Voltage loss, including battery disconnects and hybrid battery disabling
- Significant vehicle disassembly including, but not limited to, bumpers, door handles, headlamps and mirrors
- Interior trim repair or removal
- Glass removal and replacement operations

Any repairs performed without using Mopar Parts and not following published repair guidelines and procedures may expose current or future vehicle owners and occupants to unnecessary risk.

If faults were stored in the DTC memory for any safety or security system, then these systems **MUST** be serviced according to the repair procedures in Service Information. After performing repairs, recheck the system to determine if any active or stored DTCs remain; if so, take appropriate service action to ensure proper function.

SRS AIR BAG SQUIB STATUS

Multistage air bags with multiple initiators (squibs) **MUST** be checked to determine that all squibs were used during the deployment event. The driver air bag (DAB) and passenger air bag (PAB) are deployed by electrical signals generated by the occupant restraint controller (ORC) through the driver or passenger squib circuits (up to 3) to the initiators in the air bag inflators. Typically, all initiators are exhausted and all potentially hazardous chemicals are burned during an air bag deployment event.

However, it is possible for only one initiator to be exhausted; therefore, you **MUST** always confirm that all initiators have been cycled to minimize the risk of improper handling or disposal of potentially live pyrotechnic or hazardous materials. This procedure must be performed using the Mopar wiTECH diagnostic scan tool or at a company such as Collision Diagnostic Services that diagnostically remotely scans the vehicle using FCA US scan tools in conjunction with their patented asTech device, to verify the status of all air bag squibs, prior to removing deployed air bags from the vehicle for disposal.

- Service Information can be obtained at www.oem1stop.com
- Mopar wiTECH scan tools can be purchased from <https://www.techauthority.com/Pdf/WiTechOrderForm.pdf>

STEERING SYSTEM POSITION STATEMENT

SUBJECT: Steering System Inspection After a Collision

OVERVIEW: This bulletin documents the FCA US LLC position regarding conditions under which replacement or repair of steering system components are required.

MODELS: All (All) All FCA Group Vehicles

NOTE: This bulletin applies to vehicles within the following markets/countries: NAFTA, APAC, EMEA and LATAM.

DISCUSSION:

Steering Column – If the vehicle is involved in a collision where the airbag has been deployed or the steering wheel is visibly deformed, then steering column replacement is required. Internal component damage from such an event may not be visible; however, steering column replacement is required.

Steering Rack/Gear – If the vehicle is involved in a collision and visible damage or deformation is identified on the steering rack/gear, the repair facility must check for the conditions listed below before returning the vehicle to the customer. If one or more conditions from the list below are confirmed to be present, follow the Steering System Diagnosis & Testing instruction in FCA's published Service Information to correct the condition. Note: Correction of the conditions below may not require rack/gear replacement.

- Steering wheel is off center
- Vehicle pulls left or right
- Perceived column/steering wheel free play
- Steering wheel has fore and aft looseness
- Perceived dash, vehicle, steering wheel vibration by driver
- Difficult steering in either or both directions
- Steering catches/sticks
- Steering wheel does not return to center position
- Excessive road feedback
- Noise or vibration such as a rattle, excessive clunk, popping, squeaking/rubbing, scrubbing/knocking

This bulletin is supplied as technical information only and is not an authorization for repair. No part of this publication may be reproduced, stored in a retrieval system or transmitted, in any form or by any means, electronic, mechanical, photocopying or otherwise, without written permission of FCA US LLC.

STRUCTURAL REPAIR PARTS USAGE

FCA US LLC POSITION

FCA US LLC vehicles, systems and components are engineered, tested and manufactured to protect vehicle occupants based on both government-mandated and internal corporate requirements relative to durability, NVH (noise/vibration/harshness), occupant protection and vehicle safety.

The overall structural integrity of the vehicle is dependent on its inherent design specifications. Sheet metal and glass are critical elements in the design of specific crush zones that allow the energy of a collision to be absorbed in a predictable way to maximize the effectiveness of the restraint system to protect the occupants. The use of parts not specifically designed and tested by FCA US LLC may compromise the integral balance between these safety systems.

Only Authentic Mopar® Repair Parts and Mopar Glass are designed, engineered, manufactured and tested to the FCA US LLC internal and government-mandated standards and are the only parts equivalent to the originally installed parts.

FCA US LLC does not approve of or recognize structural repair procedures where Authentic Mopar Parts are not used for Chrysler, Dodge, Jeep®, Ram and FIAT® Brand vehicles. Any repairs performed not using Mopar Parts, and not following published repair guidelines and procedures, may expose current or future vehicle owners and occupants to unnecessary risk.

When restoring a collision-damaged vehicle to preloss condition, consideration must be given to the following:

- All structural distortion has been identified and corrected using appropriate structural straightening equipment (frame rack) and a three-dimensional measuring system.
- All damaged panels have been repaired or replaced.
- All replaced panels provide the as-built structural equivalence and corrosion protection of the original panels.
- Unless partial replacement procedures are documented in an FCA US LLC publication, structural panels must be installed in their entirety – partial replacement or “sectioning” of panels may compromise vehicle structure.
- FCA US LLC does not support the use or reuse of any structural component that has been removed from a vehicle previously damaged, flooded, burned, scrapped or removed from use for any other reason – commonly referred to as “salvage parts.”
- While some salvage parts may “appear” equivalent, there can be dramatic differences in the design and functional characteristics that cannot be determined by a visual inspection and could have a negative effect on the vehicle occupants in a future collision event.
- Salvage components may have been affected by crash impact loads, incorrect, improper or inadequate disassembly and removal procedures, weathering or environmental exposure outside of that expected during normal use.
- Salvage components are not traceable should a component recall be required in the future.

This statement supersedes any previously released information by FCA US LLC.

Release Date: August 11, 2010

USE OF AFTERMARKET PARTS POSITION STATEMENT

The original parts used on all FCA US LLC vehicles are designed and built to provide optimum fit, function, safety and structural integrity. These parts are carefully designed to act as a safety system and are rigorously impact tested to ensure optimal performance. Because of this, FCA US LLC does NOT approve of the use of recycled, salvaged, aftermarket or reconditioned parts. Aftermarket parts may not be built to FCA US LLC's exact design and can therefore affect the performance of important structural and safety features of the vehicle. The best way to ensure replacement parts meet the safety, performance and quality standards set by FCA US LLC is to purchase Original Equipment parts through an authorized FCA US LLC dealer. In the event that collision repairs are necessary, all repairs should be performed by a trained technician and follow vehicle-specific repair procedures available at <https://www.techauthority.com>. Failure to follow proper procedures or deviation from Original Equipment parts could result in compromising performance of impact safety systems.

FCA US LLC vehicle lease agreements specify that ONLY Genuine FCA US LLC replacement parts be utilized for collision repairs to the vehicle.

Release Date: November 20, 2019

USE OF HEAT DURING REPAIR

FCA US LLC POSITION

FCA US LLC Service Engineering's position on the use of heat during collision repair is as follows:

- Any damaged body panel or frame component must be repaired using the "cold straightening" method. No heat may be used during the straightening process.
- During rough straightening prior to replacement, damaged panels or frame components may be heated to assist in body/frame realignment. This application of heat, if absolutely necessary, must be constrained to the replacement parts and not allowed to affect any other components.

This "no heat" recommendation is due to the extensive use of high-strength and advanced high-strength steels in FCA US LLC vehicles. High-strength materials can be substantially and negatively affected by heat input which will not be obviously known to the repairer or consumer. Additionally, application of heat will alter or destroy material coatings utilized for corrosion protection which may not be restorable.

Ignoring these recommendations may lead to serious compromises in the ability to protect occupants in a future collision event, reduce the engineered qualities and attributes, or decrease the durability and reliability of the vehicle.

This statement supersedes any previously released information by FCA US LLC.

SECTION 4: WARRANTY & CORE

MOPAR[®] BASIC LIMITED WARRANTY

All Mopar[®] Warranties provided use the original date of purchase as the warranty start date, as reported on the sales receipt, to the consumer. Subsequent replacements under the warranty will receive the balance of the original warranty period. This warranty is given only to the original retail purchaser, and this warranty is thus nontransferable, unless otherwise stated, when the vehicle is sold or otherwise disposed of (i.e., the vehicle is no longer titled in consumer's name), the limited warranty ends, unless otherwise stated.

COVERAGE	TRANSFERABLE	DEALER INSTALLED	REPAIR FACILITY INSTALLED	DIY CUSTOMER INSTALLED	HOW TO SUPPORT WARRANTY REQUEST
Mopar Limited Warranty - 24 months/unlimited miles					
Except as noted below, Mopar Parts are warranted against defects in workmanship or materials.	Yes	Parts*, Labor (1), Towing*	Parts*, Labor (2)	Parts*	Claim Support*
Mopar Parts sold with a separate manufacturer's warranty are not eligible for the Mopar Warranty. Warranty information on these parts is provided with the part or in its packaging.					
Examples include but are not limited to: • Garmin navigation • TomTom navigation • Tires			• Katzkin leather • Koss headphones • Truck bedliners • Paint sealant and fabric protection • EV residential charging stations		
EXCEPTIONS: The following Mopar products have time and mileage limitations or warranty coverage that differs from the general coverage described above. See product section for warranty details.					
• Mopar Batteries • Mopar Collision Parts • Mopar Windshield Made with Corning Gorilla Glass		• Mopar Gaskets and Seals • Mopar Powertrain • Mopar Remanufactured Powertrain		• Mopar Performance Parts • Mopar Catalytic Converters • Mopar HEMI® Crate Engine Kit	

INSTALLATION TYPES:

- 1. Dealer Installed** - Assemblies installed by a Chrysler, Dodge, Jeep[®], Ram, FIAT[®] and Alfa Romeo location.
- 2. Repair Facility Installed** - Assemblies purchased wholesale and installed by an automotive business, fleet or municipal garage.
If the part is purchased by a customer and it has been validated that the part has been installed by an automotive business, fleet or municipal garage, the selling dealer can register the part as Repair Facility Installed. A copy of the repair order will need to be attached to the dealer's invoice or WRO.
- 3. DIY Customer Installed** - Assemblies purchased and installed by an individual and not by a dealer or repair facility.

Parts* - Parts are covered if the failure is determined to be a warrantable defect. The authorized Chrysler, Dodge, Jeep, Ram, FIAT and Alfa Romeo location will verify the Mopar coverage and determine the disposition (all diagnostic and labor fees are the responsibility of the retail consumer). Part restrictions may apply. Mopar Parts are covered against defects in materials and workmanship for a 90-day period (parts exchange only) for any installation which varies from the original equipment specifications. Mopar Parts replaced on an FCA US LLC vehicle still covered by the FCA US LLC New Vehicle Basic Limited Warranty are warranted for the remainder of the 3-Year/36,000-Mile New Vehicle Basic Limited Warranty.

Labor (1) – Labor is paid at FCA US warranty labor hours at the dealer's warranty labor rate.

Labor (2) – Up to \$150 for labor is paid at FCA US warranty labor hours at the repair facility or dealer labor rate, whichever is lesser of the repair facility's rate or the selling dealer's warranty rate determined by original customer installation receipt. When submitting a warranty claim, the WD must provide the part and a copy of the installer's original repair order, including the VIN, repair date, part number and labor hours if claiming labor reimbursement.

Towing* – The Mopar® Basic Limited Warranty covers the cost of towing a vehicle to the nearest authorized FCA US LLC dealership if the failure of a covered part causes the vehicle to be inoperative. VIN, mileage and date of tow are required on invoice.

Claim Support* – Customer's original repair order or receipt showing date of purchase, purchased location and labor details if applicable.

Mopar Parts are covered against defects in materials and workmanship for a 90-day period (parts exchange only) for any installation which varies from the original equipment specifications.

WHAT IS NOT COVERED:

Mopar Warranties cover neither non-FCA US LLC or non-Mopar Parts, components or equipment. These warranties also do not cover the costs of any repairs or adjustments that might be caused by or needed because of the use or installation of any non-FCA US LLC or non-Mopar Parts, equipment, materials or additives.

Mopar Warranties do not cover the costs of repairing damage or conditions caused by fire or accident; by abuse, negligence or misuse (for example: driving over curbs, or overloading or racing the vehicle); by improper adjustment, alteration or failure to maintain the vehicle on which parts are installed; or corrosion or damage caused by the use of caustic materials.

Mopar Warranties do not cover parts installed on a vehicle used for racing or competition, nor do they cover the repair of any damage or conditions caused by racing or competition.

Mopar Warranties do not cover the costs of repairing or replacing any part due to damage caused by poor or improper maintenance, contaminated fuels, or the use of fuels, oils, lubricants or fluids of a type other than those recommended in your Owners Manual.

Mopar Warranties do not cover the costs of damage caused by environmental factors or Acts of God. "Environmental factors" include such items as airborne fallout, chemicals, tree sap, salt, ocean spray and road hazards. "Acts of God" include such things as hail, floods, windstorms, lightning, tornadoes, sandstorms and earthquakes.

Mopar Warranties do not apply to parts installed on a vehicle that has had its odometer or emissions systems tampered with or disconnected, or that has been declared a total loss by any insurance company; or is rebuilt after being declared a total loss; or is issued a certificate of title indicating that it is designated as "salvage," "junk," "rebuilt" or words of similar import. FCA US LLC will deny warranty coverage without notice if it finds that a vehicle is ineligible for warranty coverage because it has been salvaged or declared a total loss as set forth in this paragraph.

Mopar Limited Warranties do not cover any incidental or consequential damages connected with the failure of the part under warranty. Such damages include lost time; inconvenience; the loss of the use of your vehicle; the cost of rental cars, gasoline, telephone, travel or lodging; the loss of personal or commercial property; or the loss of revenue. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

Your warranties can also be restricted by FCA US LLC, as set forth in the New Vehicle Limited Warranty. If your New Vehicle Limited Warranty is restricted by FCA US LLC, coverage under your Mopar Parts and Accessories Limited Warranties may also be restricted or denied.

Damage caused by any other force such as an accident, large debris, fraud, falling objects, road debris or other Acts of God are not warrantable.

Additional exclusions may apply.

OTHER TERMS

If a Mopar® Part is installed in an FCA US LLC vehicle by an authorized FCA US LLC dealer, and if, while that part is still under warranty, it causes other parts to be damaged or to fail, those other parts will be repaired or replaced under warranty, regardless of whether the other parts were covered by an FCA US LLC warranty at the time of failure. These warranties are the only express warranties made by FCA US LLC for Mopar Parts and Accessories. Except where prohibited by law, this warranty is the sole and exclusive remedy. No person, including a dealer or employee of FCA US LLC or its affiliated corporations, has the authority to vary or change these warranties.

A Mopar Part purchased in the United States and installed on Canada or Mexico market vehicles does not receive the applicable Mopar Part Warranty, with the exception of travelers from Canada or Mexico with proof of registration. These travelers can receive warranty coverage through a U.S. dealer. U.S. dealers are not allowed to register powertrain components on Canadian or Mexican registered vehicles. A Mopar Part sold to businesses in Canada or Mexico for the purpose of resale does not receive the applicable Mopar Part Warranty. International purchases made online are not covered.

©2025 FCA US LLC. All Rights Reserved. Chrysler, Dodge, Jeep, Ram, Mopar and HEMI are registered trademarks of FCA US LLC.
FIAT and ALFA ROMEO are registered trademarks of FCA Group Marketing S.p.A., used with permission.

MOPAR[®] CHEMICALS LIMITED WARRANTY

All Mopar[®] Warranties provided use the original date of purchase as the warranty start date, as reported on the sales receipt, to the consumer. Subsequent replacements under the warranty will receive the balance of the original warranty period. This warranty is given only to the original retail purchaser, and this warranty is thus nontransferable, unless otherwise stated, when the vehicle is sold or otherwise disposed of (i.e., the vehicle is no longer titled in consumer's name), the limited warranty ends, unless otherwise stated.

MOPAR® COLLISION REPLACEMENT PARTS LIFETIME LIMITED WARRANTY

All Mopar® Warranties provided use the original date of purchase as the warranty start date, as reported on the sales receipt, to the consumer. Subsequent replacements under the warranty will receive the balance of the original warranty period. This warranty is given only to the original retail purchaser, and this warranty is thus nontransferable, unless otherwise stated, when the vehicle is sold or otherwise disposed of (i.e., the vehicle is no longer titled in consumer's name), the limited warranty ends, unless otherwise stated.

COVERAGE	TRANSFERABLE	DEALER INSTALLED	REPAIR FACILITY INSTALLED	DIY CUSTOMER INSTALLED	HOW TO SUPPORT WARRANTY REQUEST
Lifetime Limited Warranty					
<p>Mopar Replacement Sheet Metal products, including plastic bumper covers and grilles, against defects in material or workmanship for as long as the original purchaser owns the vehicle on which the part is installed.</p> <p>This warranty includes perforation (metal rust-through) due to corrosion in normal use.</p>	No	Parts (1), Labor (1)	Parts (2)	Parts (2)	<p>Claim Support*</p> <p>Repair or Replace calculation*</p>

INSTALLATION TYPES:

- 1. Dealer Installed** – Assemblies installed by a Chrysler, Dodge, Jeep®, Ram, FIAT® and Alfa Romeo location.
- 2. Repair Facility Installed** – Assemblies purchased wholesale and installed by an automotive business, fleet or municipal garage.
If the part is purchased by a customer and it has been validated that the part has been installed by an automotive business, fleet or municipal garage, the selling dealer can register the part as Repair Facility Installed. A copy of the repair order will need to be attached to the dealer's invoice or WRO.
- 3. DIY Customer Installed** – Assemblies purchased and installed by an individual and not by a dealer or repair facility.

Parts (1) – Parts are covered if the failure is determined to be a warrantable defect. The authorized Chrysler, Dodge, Jeep, Ram, FIAT and Alfa Romeo location will verify the Mopar coverage and determine the disposition (all diagnostic and labor fees are the responsibility of the retail consumer). Part restrictions may apply. Mopar Parts are covered against defects in materials and workmanship for a 90-day period (parts exchange only) for any installation which varies from the original equipment specifications. Mopar Parts replaced on an FCA US LLC vehicle still covered by the FCA US LLC New Vehicle Basic Limited Warranty are warranted for the remainder of the 3-Year/36,000-Mile New Vehicle Basic Limited Warranty.

Parts (2) – Parts are covered on a replacement basis only, if the original part was sold over-the-counter. Mopar Parts are covered against defects in materials and workmanship for a 90-day period (parts exchange only) for any installation which varies from the original equipment specifications.

Labor (1) – Labor is paid at FCA US warranty labor hours at the dealer's warranty labor rate.

Claim Support* – Customer's original repair order or receipt showing date of purchase, purchased location and labor details if applicable and copy of current vehicle registration.

Repair or Replace calculation* – Replacement sheet metal products which prove to be defective due to perforation (inside-out rust-through only) will be repaired or replaced at the option of FCA US LLC. If the vehicle is eight (8) model years old or more, FCA US LLC may replace the defective part with a comparable salvage part. This warranty covers the cost of parts, labor and paint for replacement parts, including outer-panel sheet metal parts, if incurred as a result of the failure; if preapproved by FCA US LLC; and if an authorized FCA US LLC dealer originally installed the part.

WHAT IS NOT COVERED:

This warranty does not cover corrosion due to fire, accident, vehicle abuse, owner negligence or vehicle alteration; corrosion caused by sand, hail, airborne fallout, chemicals, salt, road hazards or stone damage; or surface paint deterioration or corrosion (other than inside-out perforation).

Mopar® Warranties cover neither non-FCA US LLC or non-Mopar Parts, components or equipment. These warranties also do not cover the costs of any repairs or adjustments that might be caused by or needed because of the use or installation of any non-FCA US LLC or non-Mopar Parts, equipment, materials or additives.

Mopar Warranties do not cover the costs of repairing damage or conditions caused by fire or accident; by abuse, negligence or misuse (for example: driving over curbs, or overloading or racing the vehicle); by improper adjustment, alteration or failure to maintain the vehicle on which parts are installed; or corrosion or damage caused by the use of caustic materials.

Mopar Warranties do not cover parts installed on a vehicle used for racing or competition, nor do they cover the repair of any damage or conditions caused by racing or competition.

Mopar Warranties do not cover the costs of repairing or replacing any part due to damage caused by poor or improper maintenance, contaminated fuels, or the use of fuels, oils, lubricants or fluids of a type other than those recommended in your Owners Manual.

Mopar Warranties do not cover the costs of damage caused by environmental factors or Acts of God. "Environmental factors" include such items as airborne fallout, chemicals, tree sap, salt, ocean spray and road hazards. "Acts of God" include such things as hail, floods, windstorms, lightning, tornadoes, sandstorms and earthquakes.

Mopar Warranties do not apply to parts installed on a vehicle that has had its odometer or emissions systems tampered with or disconnected, or that has been declared a total loss by any insurance company; or is rebuilt after being declared a total loss; or is issued a certificate of title indicating that it is designated as "salvage," "junk," "rebuilt" or words of similar import. FCA US LLC will deny warranty coverage without notice if it finds that a vehicle is ineligible for warranty coverage because it has been salvaged or declared a total loss as set forth in this paragraph.

Mopar Limited Warranties do not cover any incidental or consequential damages connected with the failure of the part under warranty. Such damages include lost time; inconvenience; the loss of the use of your vehicle; the cost of rental cars, gasoline, telephone, travel or lodging; the loss of personal or commercial property; or the loss of revenue. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

Your warranties can also be restricted by FCA US LLC, as set forth in the New Vehicle Limited Warranty. If your New Vehicle Limited Warranty is restricted by FCA US LLC, coverage under your Mopar Parts and Accessories Limited Warranties may also be restricted or denied.

Damage caused by any other force such as an accident, large debris, fraud, falling objects, road debris or other Acts of God are not warrantable.

Additional exclusions may apply.

OTHER TERMS

If a Mopar Part is installed in an FCA US LLC vehicle by an authorized FCA US LLC dealer, and if, while that part is still under warranty, it causes other parts to be damaged or to fail, those other parts will be repaired or replaced under warranty, regardless of whether the

other parts were covered by an FCA US LLC warranty at the time of failure. These warranties are the only express warranties made by FCA US LLC for Mopar® Parts and Accessories. Except where prohibited by law, this warranty is the sole and exclusive remedy. No person, including a dealer or employee of FCA US LLC or its affiliated corporations, has the authority to vary or change these warranties.

A Mopar Part purchased in the United States and installed on Canada or Mexico market vehicles does not receive the applicable Mopar Part Warranty, with the exception of travelers from Canada or Mexico with proof of registration. These travelers can receive warranty coverage through a U.S. dealer. U.S. dealers are not allowed to register powertrain components on Canadian or Mexican registered vehicles. A Mopar Part sold to businesses in Canada or Mexico for the purpose of resale does not receive the applicable Mopar Part Warranty. International purchases made online are not covered.

FIAT and ALFA ROMEO are registered trademarks of FCA Group Marketing S.p.A., used with permission.

MOPAR® GASKETS AND SEALS LIMITED WARRANTY

All Mopar® Warranties provided use the original date of purchase as the warranty start date, as reported on the sales receipt, to the consumer. Subsequent replacements under the warranty will receive the balance of the original warranty period. This warranty is given only to the original retail purchaser, and this warranty is thus nontransferable, unless otherwise stated, when the vehicle is sold or otherwise disposed of (i.e., the vehicle is no longer titled in consumer's name), the limited warranty ends, unless otherwise stated.

COVERAGE	TRANSFERABLE	DEALER INSTALLED	REPAIR FACILITY INSTALLED	DIY CUSTOMER INSTALLED	HOW TO SUPPORT WARRANTY REQUEST
12 months/unlimited miles from the date of repair					
Gaskets and seals	No	Parts*, Labor* (1), Towing*	Parts*	Parts*	Claim Support*

INSTALLATION TYPES:

- 1. Dealer Installed** – Assemblies installed by a Chrysler, Dodge, Jeep®, Ram, FIAT® and Alfa Romeo location.
- 2. Repair Facility Installed** – Assemblies purchased wholesale and installed by an automotive business, fleet or municipal garage. If the part is purchased by a customer and it has been validated that the part has been installed by an automotive business, fleet or municipal garage, the selling dealer can register the part as Repair Facility Installed. A copy of the repair order will need to be attached to the dealer's invoice or WRO.
- 3. DIY Customer Installed** – Assemblies purchased and installed by an individual and not by a dealer or repair facility.

Parts* – Parts are covered if the failure is determined to be a warrantable defect. The authorized Chrysler, Dodge, Jeep, Ram, FIAT and Alfa Romeo location will verify the Mopar Part's eligibility and determine the disposition (all diagnostic and labor fees are the responsibility of the retail consumer). Part restrictions may apply. Mopar Parts are covered against defects in materials and workmanship for a 90-day period (parts exchange only) for any installation which varies from the original equipment specifications. Mopar Parts replaced on an FCA US LLC vehicle still covered by the FCA US LLC New Vehicle Basic Limited Warranty are warranted for the remainder of the 3-Year/36,000-Mile New Vehicle Basic Limited Warranty.

Labor* – Labor is paid at FCA US warranty labor hours at the dealer's warranty labor rate.

Towing* – The Mopar Basic Limited Warranty covers the cost of towing a vehicle to the nearest authorized FCA US LLC dealership if the failure of a covered part causes the vehicle to be inoperative. VIN, mileage and date of tow are required on invoice.

Claim Support* – Customer's original repair order or receipt showing date of purchase, purchased location and labor details if applicable.

WHAT IS NOT COVERED:

Mopar Warranties cover neither non-FCA US LLC or non-Mopar Parts, components or equipment. These warranties also do not cover the costs of any repairs or adjustments that might be caused by or needed because of the use or installation of any non-FCA US LLC or non-Mopar Parts, equipment, materials or additives.

Mopar Warranties do not cover the costs of repairing damage or conditions caused by fire or accident; by abuse, negligence or misuse (for example: driving over curbs, or overloading or racing the vehicle); by improper adjustment, alteration or failure to maintain the vehicle on which parts are installed; or corrosion or damage caused by the use of caustic materials.

Mopar® Warranties do not cover parts installed on a vehicle used for racing or competition, nor do they cover the repair of any damage or conditions caused by racing or competition.

Mopar Warranties do not cover the costs of repairing or replacing any part due to damage caused by poor or improper maintenance, contaminated fuels, or the use of fuels, oils, lubricants or fluids of a type other than those recommended in your Owners Manual.

Mopar Warranties do not cover the costs of damage caused by environmental factors or Acts of God. "Environmental factors" include such items as airborne fallout, chemicals, tree sap, salt, ocean spray and road hazards. "Acts of God" include such things as hail, floods, windstorms, lightning, tornadoes, sandstorms and earthquakes.

Mopar Warranties do not apply to parts installed on a vehicle that has had its odometer or emissions systems tampered with or disconnected, or that has been declared a total loss by any insurance company; or is rebuilt after being declared a total loss; or is issued a certificate of title indicating that it is designated as "salvage," "junk," "rebuilt" or words of similar import. FCA US LLC will deny warranty coverage without notice if it finds that a vehicle is ineligible for warranty coverage because it has been salvaged or declared a total loss as set forth in this paragraph.

Mopar Limited Warranties do not cover any incidental or consequential damages connected with the failure of the part under warranty. Such damages include lost time; inconvenience; the loss of the use of your vehicle; the cost of rental cars, gasoline, telephone, travel or lodging; the loss of personal or commercial property; or the loss of revenue. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

Your warranties can also be restricted by FCA US LLC, as set forth in the New Vehicle Limited Warranty. If your New Vehicle Limited Warranty is restricted by FCA US LLC, coverage under your Mopar Parts and Accessories Limited Warranties may also be restricted or denied.

Damage caused by any other force such as an accident, large debris, fraud, falling objects, road debris or other Acts of God are not warrantable.

Additional exclusions may apply.

OTHER TERMS

If a Mopar Part is installed in an FCA US LLC vehicle by an authorized FCA US LLC dealer, and if, while that part is still under warranty, it causes other parts to be damaged or to fail, those other parts will be repaired or replaced under warranty, regardless of whether the other parts were covered by an FCA US LLC warranty at the time of failure. These warranties are the only express warranties made by FCA US LLC for Mopar Parts and Accessories. Except where prohibited by law, this warranty is the sole and exclusive remedy. No person, including a dealer or employee of FCA US LLC or its affiliated corporations, has the authority to vary or change these warranties.

A Mopar Part purchased in the United States and installed on Canada or Mexico market vehicles does not receive the applicable Mopar Part Warranty, with the exception of travelers from Canada or Mexico with proof of registration. These travelers can receive warranty coverage through a U.S. dealer. U.S. dealers are not allowed to register powertrain components on Canadian or Mexican registered vehicles. A Mopar Part sold to businesses in Canada or Mexico for the purpose of resale does not receive the applicable Mopar Part Warranty. International purchases made online are not covered.

Parts* – Parts are covered if the failure is determined to be a warrantable defect. The authorized Chrysler, Dodge, Jeep, Ram, FIAT and Alfa Romeo location will verify the Mopar Part's eligibility and determine the disposition (all diagnostic and labor fees are the responsibility of the retail consumer). Part restrictions may apply. Mopar Parts are covered against defects in materials and workmanship for a 90-day period (parts exchange only) for any installation which varies from the original equipment specifications. Mopar Parts replaced on an FCA US LLC vehicle still covered by the FCA US LLC New Vehicle Basic Limited Warranty are warranted for the remainder of the 3-Year/36,000-Mile New Vehicle Basic Limited Warranty.

Part Availability* – A battery that fails under the New Vehicle Basic Limited Warranty will be replaced with a Mopar Battery of equal or next highest amp-hour rating.

Labor (1) – Labor is paid at FCA US warranty labor hours at the dealer's warranty labor rate.

Labor (2) – Up to \$150 for labor is paid at FCA US warranty labor hours at the repair facility or dealer labor rate, whichever is lesser of the repair facility's rate or the selling dealer's warranty rate determined by original customer installation receipt. When submitting a warranty claim, the WD must provide the part and a copy of the installer's original repair order, including the VIN, repair date, part number and labor hours if claiming labor reimbursement.

Towing* – The Mopar® Basic Limited Warranty covers the cost of towing a vehicle to the nearest authorized FCA US LLC dealership if the failure of a covered part causes the vehicle to be inoperative. VIN, mileage and date of tow are required on invoice.

Claim Support (1) – Customer's original repair order or receipt showing date of purchase, purchased location and labor details if applicable.

Claim Support (2) – Copy of customer's original repair order from warranty repair showing date of repair, repair details and repairing dealership details.

WHAT IS NOT COVERED:

Batteries that are discharged are not considered defective.

Mopar Warranties cover neither non-FCA US LLC or non-Mopar Parts, components or equipment. These warranties also do not cover the costs of any repairs or adjustments that might be caused by or needed because of the use or installation of any non-FCA US LLC or non-Mopar Parts, equipment, materials or additives.

Mopar Warranties do not cover the costs of repairing damage or conditions caused by fire or accident; by abuse, negligence or misuse (for example: driving over curbs, or overloading or racing the vehicle); by improper adjustment, alteration or failure to maintain the vehicle on which parts are installed; or corrosion or damage caused by the use of caustic materials.

Mopar Warranties do not cover parts installed on a vehicle used for racing or competition, nor do they cover the repair of any damage or conditions caused by racing or competition.

Mopar Warranties do not cover the costs of repairing or replacing any part due to damage caused by poor or improper maintenance, contaminated fuels, or the use of fuels, oils, lubricants or fluids of a type other than those recommended in your Owners Manual.

Mopar Warranties do not cover the costs of damage caused by environmental factors or Acts of God. "Environmental factors" include such items as airborne fallout, chemicals, tree sap, salt, ocean spray and road hazards. "Acts of God" include such things as hail, floods, windstorms, lightning, tornadoes, sandstorms and earthquakes.

Mopar Warranties do not apply to parts installed on a vehicle that has had its odometer or emissions systems tampered with or disconnected, or that has been declared a total loss by any insurance company; or is rebuilt after being declared a total loss; or is issued a certificate of title indicating that it is designated as "salvage," "junk," "rebuilt" or words of similar import. FCA US LLC will deny warranty coverage without notice if it finds that a vehicle is ineligible for warranty coverage because it has been salvaged or declared a total loss as set forth in this paragraph.

Mopar Limited Warranties do not cover any incidental or consequential damages connected with the failure of the part under warranty. Such damages include lost time; inconvenience; the loss of the use of your vehicle; the cost of rental cars, gasoline, telephone, travel or lodging; the loss of personal or commercial property; or the loss of revenue. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

Your warranties can also be restricted by FCA US LLC, as set forth in the New Vehicle Limited Warranty. If your New Vehicle Limited Warranty is restricted by FCA US LLC, coverage under your Mopar Parts and Accessories Limited Warranties may also be restricted or denied.

Damage caused by any other force such as an accident, large debris, fraud, falling objects, road debris or other Acts of God are not warrantable.

Additional exclusions may apply.

OTHER TERMS

If a Mopar® Part is installed in an FCA US LLC vehicle by an authorized FCA US LLC dealer, and if, while that part is still under warranty, it causes other parts to be damaged or to fail, those other parts will be repaired or replaced under warranty, regardless of whether the other parts were covered by an FCA US LLC warranty at the time of failure. These warranties are the only express warranties made by FCA US LLC for Mopar Parts and Accessories. Except where prohibited by law, this warranty is the sole and exclusive remedy. MOPAR® WINDSHIELD MADE WITH CORNING GORILLA GLASS WARRANTY

All Mopar® Warranties provided use the original date of purchase as the warranty start date, as reported on the sales/installation receipt, to the consumer. The Mopar Gorilla Glass Warranty only covers (1) replacement in the 2-year warranty period. This warranty is given only to the original retail purchaser, and this warranty is thus nontransferable, unless otherwise stated, when the vehicle is sold or otherwise disposed of (i.e., the vehicle is no longer titled in consumer's name), the limited warranty ends, unless otherwise stated.

COVERAGE	TRANSFERABLE	DEALER INSTALLED	REPAIR FACILITY INSTALLED	DIY CUSTOMER INSTALLED	HOW TO SUPPORT WARRANTY REQUEST
2-year limited (from date of install), unlimited-mile warranty					
Mopar Windshield Made with Corning Gorilla Glass, provides for labor and parts needed to repair or replace your windshield under certain conditions.	Yes	Parts*, Labor (1)	Parts*, Labor (2),	Parts*	Claim Support*

INSTALLATION TYPES:

- 1. Dealer Installed** – Assemblies installed by a Chrysler, Dodge, Jeep®, Ram, FIAT® and Alfa Romeo location.
- 2. Repair Facility Installed** – Assemblies purchased wholesale and installed by an automotive business, fleet or municipal garage. If the part is purchased by a customer and it has been validated that the part has been installed by an automotive business, fleet or municipal garage, the selling dealer can register the part as Repair Facility Installed. A copy of the repair order will need to be attached to the dealer's invoice or WRO.
- 3. DIY Customer Installed** – Assemblies purchased and installed by an individual and not by a dealer or repair facility.

Parts* – Mopar warrants your windshield from damage associated with road debris such as pebbles or other small objects which may cause initial damage larger than a US quarter (1 inch/25mm) and less than 3 inches/7.6 cm. Larger instances or smaller blemishes, along with the subsequent cracking that may be caused by not repairing them, are not covered by this warranty. Parts are covered if the failure is determined to be a warrantable defect. The authorized Chrysler, Dodge, Jeep, Ram, SRT® dealership or FIAT Studio will verify the Mopar Part's eligibility and determine the disposition (all diagnostic and labor fees are the responsibility of the retail consumer). Part restrictions may apply. Mopar Parts are covered against defects in materials and workmanship for a 90-day period (parts exchange only) for any installation which varies from the original equipment specifications.

Labor (1) – Labor is paid at FCA US warranty labor hours at the dealer's warranty labor rate.

Labor (2) – Up to \$150 for labor is paid at FCA US warranty labor hours at the repair facility or Dealer Labor Rate, whichever is lesser of the repair facility's rate or the selling dealer's warranty rate determined by original customer installation receipt. When submitting a warranty claim, the WD must provide the part and a copy of the installer's original repair order, including the VIN, repair date, part number and labor hours if claiming labor reimbursement.

Claim Support* – Dealer requires proof of purchase and windshield will only be repaired or replaced under the warranty once within the warrantable period. Customer's original repair order or receipt showing date of purchase, purchased location and labor details if applicable.

WHAT IS NOT COVERED:

Damage caused by any other force such as an accident, large debris, fraud, falling objects or other Acts of God are not warrantable. The damage from road debris referred to in this section is warrantable notwithstanding other provisions in the Mopar Warranty.

Mopar Warranties cover neither non-FCA US LLC or non-Mopar Parts, components or equipment. These warranties also do not cover the costs of any repairs or adjustments that might be caused by or needed because of the use or installation of any non-FCA US LLC

or non-Mopar® Parts, equipment, materials or additives.

Mopar Warranties do not cover the costs of repairing damage or conditions caused by fire or accident; by abuse, negligence or misuse (for example: driving over curbs, or overloading or racing the vehicle); by improper adjustment, alteration or failure to maintain the vehicle on which parts are installed; or corrosion or damage caused by the use of caustic materials.

Mopar Warranties do not cover parts installed on a vehicle used for racing or competition, nor do they cover the repair of any damage or conditions caused by racing or competition.

Mopar Warranties do not cover the costs of repairing or replacing any part due to damage caused by poor or improper maintenance, contaminated fuels, or the use of fuels, oils, lubricants or fluids of a type other than those recommended in your Owners Manual.

Mopar Warranties do not cover the costs of damage caused by environmental factors or Acts of God. "Environmental factors" include such items as airborne fallout, chemicals, tree sap, salt, ocean spray and road hazards. "Acts of God" include such things as hail, floods, windstorms, lightning, tornadoes, sandstorms and earthquakes.

Mopar Warranties do not apply to parts installed on a vehicle that has had its odometer or emissions systems tampered with or disconnected, or that has been declared a total loss by any insurance company; or is rebuilt after being declared a total loss; or is issued a certificate of title indicating that it is designated as "salvage," "junk," "rebuilt" or words of similar import. FCA US LLC will deny warranty coverage without notice if it finds that a vehicle is ineligible for warranty coverage because it has been salvaged or declared a total loss as set forth in this paragraph.

Mopar Limited Warranties do not cover any incidental or consequential damages connected with the failure of the part under warranty. Such damages include lost time; inconvenience; the loss of the use of your vehicle; the cost of rental cars, gasoline, telephone, travel or lodging; the loss of personal or commercial property; or the loss of revenue. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

Your warranties can also be restricted by FCA US LLC, as set forth in the New Vehicle Limited Warranty. If your New Vehicle Limited Warranty is restricted by FCA US LLC, coverage under your Mopar Parts and Accessories Limited Warranties may also be restricted or denied.

Damage caused by any other force such as an accident, large debris, fraud, falling objects, road debris or other Acts of God are not warrantable.

Additional exclusions may apply.

OTHER TERMS

If a Mopar Part is installed in an FCA US LLC vehicle by an authorized FCA US LLC dealer, and if, while that part is still under warranty, it causes other parts to be damaged or to fail, those other parts will be repaired or replaced under warranty, regardless of whether the other parts were covered by an FCA US LLC warranty at the time of failure. These warranties are the only express warranties made by FCA US LLC for Mopar Parts and Accessories. Except where prohibited by law, this warranty is the sole and exclusive remedy. No person, including a dealer or employee of FCA US LLC or its affiliated corporations, has the authority to vary or change these warranties.

A Mopar Part purchased in the United States and installed on Canada or Mexico market vehicles does not receive the applicable Mopar Part Warranty, with the exception of travelers from Canada or Mexico with proof of registration. These travelers can receive warranty coverage through a U.S. dealer. U.S. dealers are not allowed to register powertrain components on Canadian or Mexican registered vehicles. A Mopar Part sold to businesses in Canada or Mexico for the purpose of resale does not receive the applicable Mopar Part Warranty. International purchases made online are not covered.

MOPAR® POWERTRAIN LIMITED WARRANTY

POWERTRAIN COVERAGE

All Mopar® Warranties provided use the original date of purchase as the warranty start date, as reported on the sales receipt, to the consumer. Subsequent replacements under the warranty will receive the balance of the original warranty period. All powertrain items covered under the 3-year/100,000-mile limited warranty are transferrable to subsequent owners. All other warranties are given only to the original retail purchaser, and this warranty is thus nontransferable, unless otherwise stated, when the vehicle is sold or otherwise disposed of (i.e., the vehicle is no longer titled in consumer's name), the limited warranty ends.

NOTE: Torque converters and transmission rebuild kits are covered under the Mopar 2-Year/Unlimited-Miles Basic Limited Warranty.

INSTALLATION TYPES:

- 1. Dealer Installed** - Assemblies installed by a Chrysler, Dodge, Jeep®, Ram, FIAT® and Alfa Romeo location.
- 2. Repair Facility Installed** - Assemblies purchased wholesale and installed by an automotive business, fleet or municipal garage. If the part is purchased by a customer and it has been validated that the part has been installed by an automotive business, fleet or municipal garage, the selling dealer can register the part as Repair Facility Installed. A copy of the repair order will need to be attached to the dealer's invoice or WRO.
- 3. DIY Customer Installed** - Assemblies purchased and installed by an individual and not by a dealer or repair facility.

Parts* – Parts are covered if the failure is determined to be a warrantable defect. DIY customer must submit the Mopar® Powertrain Part in question, or vehicle it is installed in and proof of purchase containing part number, serial number and the date of purchase and/or the completed Warranty Registration Card that has been registered electronically in DealerCONNECT. Effective June 1, 2016, Cummins Running Complete engines do not need to be registered using the electronic Mopar Powertrain Warranty Registration System. In order to validate warranty coverage, the customer must present the repair order complete with the following information: VIN, part number, serial number, date and mileage at time of repair. The authorized Chrysler, Dodge, Jeep®, Ram, FIAT® and Alfa Romeo location will verify the Mopar Powertrain Part's eligibility and determine the disposition (all diagnostic and labor fees are the responsibility of the retail consumer). Part restrictions may apply. Contact 866-262-8517 Prompt 1 if you have any questions. Mopar Parts replaced on an FCA US LLC vehicle still covered by the FCA US LLC New Vehicle Basic Limited Warranty are warranted for the remainder of the Powertrain New Vehicle Basic Limited Warranty.

Labor (1) – Labor is paid at FCA US warranty labor hours at the dealer's warranty labor rate.

Labor (2) – Labor is paid at FCA US warranty labor hours at the repair facility or dealer labor rate, whichever is lesser of the repair facility's rate or the selling dealer's warranty rate determined by original customer installation receipt. When submitting a warranty claim, the WD must provide the part and a copy of the installer's original repair order, including the VIN, repair date, part number and labor hours if claiming labor reimbursement. Warranty pre-approval is required: 866-262-8517 Prompt 2.

Towing* – Towing is covered with a maximum allowance of \$75.00. VIN, mileage and date of tow are required on invoice.

Mopar Powertrain Warranty Registration System* – To activate the Powertrain Warranty, complete the Mopar Parts Powertrain Warranty Registration at the time of sale via DealerCONNECT for both dealer installed, independent repair facility installed and over-the-counter wholesale Mopar and Mopar Remanufactured and SUSTAINera Powertrain components. At the time of sale, a copy of the limited warranty and registration card found in the component packaging must be provided to the customer.

Claim Support* – Part registration at time of installation or customer's original repair order or receipt showing date of purchase, purchased location and labor details if applicable.

It is required that all 3-Year/100,000-Mile Limited Warranty Powertrain Parts be registered at the time of sale to the installer. You can verify that a powertrain part has been registered with FCA US by entering the "Mopar Part Registration" application under the Service tab on DealerCONNECT. Once in the application, just enter the last eight digits of the VIN and click on the "Search" button. Any available registrations should then come up. If the part has not been registered, the message "Registration Not Found" will appear at the top of the application.

** HEMI® crate engine kits are covered by a 3-Year/100,000-Mile Powertrain Limited (parts exchange only) Warranty. Crate Engine Controller Kit must be purchased on the same invoice as the engine to qualify for the 3-Year/100,000-Mile Parts Exchange Warranty. Failure to provide proof of the installation kit with the engine will void the 3-Year/100,000-Mile Powertrain Warranty. Direct Connection HEMI crate engines would then be covered against defects in materials and workmanship for a 90-day period (parts exchange only).

*** Complete remanufactured and SUSTAINera Cummins diesel engines purchased for use in any other application than an FCA US Ram truck will void the 2-Year/100,000-Mile Warranty. Mopar Powertrain Parts are covered against defects in materials and workmanship for a 90-day period (parts exchange only) for any installation which varies from the original equipment specifications.

**** For Cummins short and long block engines and cylinder heads purchased prior to May 1, 2017, the coverage is for 6 months and unlimited mileage.

***** Some individual parts listed are covered by the Mopar 3-Year/100,000-Mile Powertrain Parts Limited Warranty only if they are purchased as part of the engine or transmission assembly. Parts purchased individually are covered by the Mopar 2-Year/Unlimited-Mileage Basic Limited Warranty.

WHAT IS NOT COVERED:

Mopar Warranties cover neither non-FCA US LLC or non-Mopar Parts, components or equipment. These warranties also do not cover the costs of any repairs or adjustments that might be caused by or needed because of the use or installation of any non-FCA US LLC or non-Mopar Parts, equipment, materials or additives.

Mopar Warranties do not cover the costs of repairing damage or conditions caused by fire or accident; by abuse, negligence or misuse (for example: driving over curbs, or overloading or racing the vehicle); by improper adjustment, alteration or failure to maintain the vehicle on which parts are installed; or corrosion or damage caused by the use of caustic materials.

Mopar® Warranties do not cover parts installed on a vehicle used for racing or competition, nor do they cover the repair of any damage or conditions caused by racing or competition.

Mopar Warranties do not cover the costs of repairing or replacing any part due to damage caused by poor or improper maintenance, contaminated fuels, or the use of fuels, oils, lubricants or fluids of a type other than those recommended in your Owners Manual.

Mopar Warranties do not cover the costs of damage caused by environmental factors or Acts of God. "Environmental factors" include such items as airborne fallout, chemicals, tree sap, salt, ocean spray and road hazards. "Acts of God" include such things as hail, floods, windstorms, lightning, tornadoes, sandstorms and earthquakes.

Mopar Warranties do not apply to parts installed on a vehicle that has had its odometer or emissions systems tampered with or disconnected, or that has been declared a total loss by any insurance company; or is rebuilt after being declared a total loss; or is issued a certificate of title indicating that it is designated as "salvage," "junk," "rebuilt" or words of similar import. FCA US LLC will deny warranty coverage without notice if it finds that a vehicle is ineligible for warranty coverage because it has been salvaged or declared a total loss as set forth in this paragraph.

Mopar Limited Warranties do not cover any incidental or consequential damages connected with the failure of the part under warranty. Such damages include lost time; inconvenience; the loss of the use of your vehicle; the cost of rental cars, gasoline, telephone, travel or lodging; the loss of personal or commercial property; or the loss of revenue. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

Your warranties can also be restricted by FCA US LLC, as set forth in the New Vehicle Limited Warranty. If your New Vehicle Limited Warranty is restricted by FCA US LLC, coverage under your Mopar Parts and Accessories Limited Warranties may also be restricted or denied.

Damage caused by any other force such as an accident, large debris, fraud, falling objects, road debris or other Acts of God are not warrantable.

Additional exclusions may apply.

OTHER TERMS:

NOTE: Powertrain components purchased in the United States and installed on Canada or Mexico market vehicles do not receive the applicable Powertrain Warranty, with the exception of travelers from Canada or Mexico with proof of registration. These travelers can receive warranty coverage through a U.S. dealer. U.S. dealers are not allowed to register powertrain components on Canadian or Mexican registered vehicles. Powertrain components sold to businesses in Canada or Mexico for the purpose of resale do not receive the applicable Powertrain Warranty. International purchases made online are not covered.

Mopar Parts are covered against defects in materials and workmanship for a 90-day period (parts exchange only) for any installation which varies from the original equipment specifications.

OVERHEATED ENGINES WARRANTY POLICY

Mopar® is announcing a new warranty policy change for any previously replaced engine due to engine overheat conditions. This policy change is effective with vehicles received for repair on or after September 30, 2023.

Engine overheating conditions are not warrantable, and therefore are not covered under any applicable warranty (Powertrain, Mopar, etc.).

The exceptions that could be covered under warranty would be:

- A Mopar cooling system part caused the overheat condition (water pump, thermostat, etc.).

Note: Proof of the Mopar causal part purchase or work order must be provided for Mopar (M) type claims. For Warranty (W) type claims, the failed cooling system component must be identified and noted in the technician notes.

If a customer/independent repair facility (IRF) returns an engine that was purchased over-the-counter with a warranty concern, the dealer will verify that the correct engine was returned by checking the engine serial number, confirm if the part was registered and inspect the heat tabs. If the heat tabs are pink or red, the rules below apply. If the heat tabs are pink or red, confirm a warrantable cooling system failure. If this process is not followed, the dealer could be subject to chargeback for accepting the incorrect or defective engine.

Normal White Sensor

Overheated Pink Sensor
255°F Coolant Temp

Overheated Red Sensor
+255°F Coolant Temp

When a customer returns with an engine warranty concern from a prior repair, the dealer's technician must complete the following:

- Verify the engine serial number.
- Inspect the heat tabs.
- If the heat tabs are pink or red, root cause a warrantable Mopar cooling system failure prior to installing a Mopar replacement engine.

Note: If this process is not followed, the dealer could be subject to chargeback for accepting the incorrect or defective engine.

MOPAR® RECOMMENDATION

- Inspect and/or replace the cooling system components on the initial replacement (examples below):
 - Water Pump
 - Thermostat
 - Radiator
 - Hoses/Clamps
 - Drain and fill the cooling system according to procedure.
 - Inspect cooling fans.
-

ADDITIONAL INFORMATION

- Multi-layered steel head gasket failures and warped head/block are the result of an overheat, not the cause of the overheat.
- Loose head bolts are a result of a collapsed head gasket after an overheat condition.
- All Mopar® Service engines are end-of-the-line tested for leak down, compression and oil pressure compliance.

DIRECT CONNECTION PERFORMANCE PARTS LIMITED WARRANTIES & REGULATORY STATEMENTS

WHAT IS NOT COVERED:

Except as noted below, Mopar® Parts installed by an authorized FCA US LLC dealership, including Chrysler, Dodge, Jeep®, Ram, FIAT® and Alfa Romeo locations are warranted against defects in workmanship or materials for 24 months/unlimited miles for both parts and labor. Mopar Parts sold wholesale to an automotive service facility and installed by a professional technician are warranted against defects in workmanship or materials for 24 months/unlimited miles for parts and up to \$150.00 in labor. Mopar Parts sold over-the-counter for vehicle owner or do-it-yourself installation are warranted against defects in workmanship or materials for 24 months/unlimited miles for parts exchange only. Mopar Parts replaced on an FCA US LLC vehicle still covered by the FCA US LLC New Vehicle Basic Limited Warranty are warranted for the remainder of the 3-Year/36,000-Mile New Vehicle Basic Limited Warranty.

The Mopar Basic Limited Warranty covers the cost of towing a vehicle to the nearest authorized FCA US LLC dealership if the failure of a covered part causes the vehicle to be inoperative. If a Mopar Part is installed in an FCA US LLC vehicle by an authorized FCA US LLC dealer, and if, while that part is still under warranty, it causes other parts to be damaged or to fail, those other parts will be repaired or replaced under warranty, regardless of whether the other parts were covered by an FCA US LLC warranty at the time of failure. These warranties are the only express warranties made by FCA US LLC for Mopar Parts and Accessories. Except where prohibited by law, this warranty is the sole and exclusive remedy. No person, including a dealer or employee of FCA US LLC or its affiliated corporations, has the authority to vary or change these warranties.

Mopar Parts sold with a separate manufacturer's warranty are not eligible for the Mopar warranty. Warranty information on these parts is provided with the part or in its packaging. Examples include: Garmin navigation, TomTom navigation, Katzkin leather, Koss headphones, truck bedliners, paint sealant and fabric protection.

EXCEPTIONS

The following Direct Connection products have time and mileage limitations or warranty coverage that differs from the general coverage described above: Mopar Batteries, Mopar Collision Parts, Mopar Windshield Made with Corning Gorilla Glass, Mopar Catalytic Converters, Mopar Gaskets and Seals, Mopar Powertrain, Mopar Remanufactured Powertrain, Direct Connection HEMI® Crate Engines & Engine Kits, Direct Connection Performance Parts.

NOTICE

Federal and many state laws prohibit the removal, modification or rendering inoperative of any part or element of design affecting emissions or safety on motor vehicles used for transporting persons or property on a public street or highway. Violation may result in a fine imposed for each vehicle impacted. Many performance parts listed in this catalog cannot be used on vehicles used on public streets or highways. These parts may be used only on vehicles used solely in sanctioned off-highway events. No other applications for these parts are intended or implied. Those parts that have been granted an exemption by the California Air Resources Board (CARB) or meet the EPA requirements of memorandum 1A are legal for highway use in California, New York and Massachusetts and are noted as such.

DIRECT CONNECTION HEMI® CRATE ENGINE KIT POWERTRAIN LIMITED WARRANTY

HEMI® crate engine kits are covered by a 3-Year/100,000-Mile Powertrain Limited (parts exchange only) Warranty. Crate Engine Controller Kit must be purchased on the same invoice as the engine to qualify for the 3-Year/100,000-Mile Parts Exchange Warranty. Failure to provide proof of the installation kit with the engine will void the 3-Year/100,000-Mile Powertrain Warranty. Direct Connection HEMI crate engines would then be covered against defects in materials and workmanship for a 90-day period (parts exchange only).

DIRECT CONNECTION PARTS BEGINNING WITH “770...”

Mopar® Basic Limited Warranty Except as noted below, Direct Connection Performance Parts beginning with “770...” installed by a Dodge Power Brokers Dealership are warranted against defects in workmanship or materials for 24 months/unlimited miles from date of purchase for both parts and labor. Direct Connection parts sold wholesale to an automotive service facility and installed by a professional technician are warranted against defects in workmanship or materials for 24 months/unlimited miles from date of purchase for parts and up to \$150.00 in labor. Direct Connection parts sold over-the-counter for vehicle owner or do-it-yourself installation are warranted against defects in workmanship or materials for 24 months/unlimited miles from date of purchase for parts exchange only. Direct Connection parts when installed/replaced by a Dodge Power Brokers Dealership on an FCA US LLC vehicle still covered by the FCA US LLC New Vehicle Basic Limited Warranty are warranted for the remainder of the 3-Year/36,000-Mile New Vehicle Basic Limited Warranty and the 5-Year/60,000-Mile Powertrain Limited Warranty or the Direct Connection 24-Month Basic Limited Warranty from the original installation date, whichever is more favorable to the customer. CUSTOMER MUST KEEP ORIGINAL RECEIPT.

DIRECT CONNECTION PARTS BEGINNING WITH “PW...”

Direct Connection PW Performance Parts Limited Warranty Direct Connection PW Performance Parts are those parts with a part number beginning in “PW” and do not include any other Performance Parts. Except as noted below, Direct Connection PW Performance Parts installed by a Dodge Power Brokers Dealerships are warranted against defects in workmanship or materials for 12 months/12,000 miles for both parts and labor from date of purchase. Direct Connection PW Performance Parts sold wholesale to an automotive service facility and installed by a professional technician are warranted against defects in workmanship or materials for 12 months/12,000 miles from date of purchase for parts and up to \$150.00 in labor. Direct Connection PW Performance Parts sold over-the-counter for vehicle owner or do-it-yourself installation are warranted against defects in workmanship or materials for 12 months/12,000 miles from date of purchase for parts exchange only. CUSTOMER MUST KEEP ORIGINAL RECEIPT.

DIRECT CONNECTION PARTS BEGINNING WITH “P...” OR “O...”

NO PARTS WARRANTY - “AS IS”

Direct Connection Parts with part numbers beginning with “P...” or “O...” are sold “as is” without warranty coverage of any kind by Direct Connection unless otherwise noted. Direct Connection Gen II crate engine assemblies are warranted for “parts only” “as delivered” against defects in materials or workmanship for 90 days from the date of purchase. The following covered components for Direct Connection engine assemblies, which prove to be defective in materials or workmanship, will be replaced on an exchange basis for 90 days: cylinder blocks and all internal parts; cylinder head assemblies; intake manifold; core plugs; valve covers; oil pan; timing gear and/or chain and cover; water pump; gaskets and seals.

PLEASE NOTE:

The limited warranty period starts on the day the part is sold, as reported on the sales receipt, to the consumer. The limited warranty is not transferable. When the vehicle is sold or otherwise disposed of (i.e., the vehicle is no longer titled in consumer's name), the limited warranty ends. CONSUMER MUST KEEP ORIGINAL RECEIPT.

Implied warranties, such as warranties of merchantability, are excluded. (An implied warranty of merchantability means that the part is reasonably fit for the general purpose for which it was sold.) The entire risk as to quality and performance of such parts is with the buyer. Should such parts prove defective following their purchase, the buyer and not the manufacturer, distributor or retailer, assumes the entire cost of all necessary servicing or repair. Chrysler, Dodge, Jeep, and Ram vehicle and parts warranties are voided if the vehicle or parts are used for competition. The addition of performance parts does not by itself void a vehicle's warranty. However, added performance parts (parts not originally supplied on the vehicle from the factory) are not covered by the vehicle's warranty, and any failure that they may cause is not covered by the vehicle's warranty.

Direct Connection Limited Warranties do not cover any incidental or consequential damages connected with the failure of the part under warranty. Such damages include lost time, inconvenience, the loss of the use of your vehicle, the cost of rental cars, gasoline, telephone, travel or lodging; the loss of personal or commercial property; or the loss of revenue. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

Your warranties can also be restricted by FCA US LLC, as set forth in the New Vehicle Limited Warranty. If your New Vehicle Limited Warranty is restricted by FCA US LLC, coverage under your Direct Connection Parts and Accessories Limited Warranties may also be restricted or denied.

EMISSIONS STATEMENT

Direct Connection Performance customers are responsible for complying with applicable federal state and local environmental laws and regulations. Many Direct Connection Performance Parts and components are designed to be equipped in vehicles that are operated not on streets or highways (such as vehicles intended for competition or off-road use). Motor vehicles designed for transport on streets or highways and equipped with such parts may cause such motor vehicles to be out of compliance with applicable emissions standards. It may be a violation of federal and state law to operate such motor vehicles equipped with such parts, except where vehicles equipped with such parts are operated not on streets or highways and where such vehicles lack features customarily associated with safe and practical highway use.

If you install such parts on a motor vehicle, and your motor vehicle fails a required state or local inspection and maintenance (I/M) emissions test, including any test required to maintain or renew your motor vehicle's registration, or if your motor vehicle is subject to an emissions recall, in either case, FCA US LLC may not be required to repair your motor vehicle under the emissions warranty, and you may be required to remove those parts and replace them with other parts at your own expense in order to obtain repairs necessary to pass the I/M emissions test or to ensure your motor vehicle is compliant with applicable emissions standards after the recall repair.

HOW TO OBTAIN WARRANTY SERVICE

Where both parts and labor are covered in warranty items, repair will be made by any Dodge Power Brokers Dealership at no charge. Where parts only are covered, the Dodge Power Brokers Dealership will provide replacement parts at no charge. It is recommended that vehicles be taken to the selling dealership or to the dealer who sold or installed the Direct Connection Performance part or accessory. However, replacement parts or service under warranty may be obtained from any authorized Dodge Power Brokers Dealership.

WHAT IS NOT COVERED:

Direct Connection warranties cover neither non-FCA US LLC or non-Direct Connection Parts, components or equipment. These warranties also do not cover the costs of any repairs or adjustments that might be caused by or needed because of the use or installation of any non-FCA US LLC or non-Direct Connection Parts, equipment, materials or additives.

Direct Connection warranties do not cover the costs of repairing damage or conditions caused by fire or accident; by abuse, negligence or misuse (for example: driving over curbs, or overloading or racing the vehicle); by improper adjustment, alteration or failure to maintain the vehicle on which parts are installed; or corrosion or damage caused by the use of caustic materials.

Direct Connection warranties do not cover parts installed on a vehicle used for racing or competition, nor do they cover the repair of any damage or conditions caused by racing or competition.

Direct Connection warranties do not cover the costs of repairing or replacing any part due to damage caused by poor or improper maintenance, contaminated fuels, or the use of fuels, oils, lubricants or fluids of a type other than those recommended in your Owners Manual.

Direct Connection warranties do not cover the costs of damage caused by environmental factors or Acts of God. "Environmental factors" include such items as airborne fallout, chemicals, tree sap, salt, ocean spray and road hazards. "Acts of God" include such things as hail, floods, windstorms, lightning, tornadoes, sandstorms and earthquakes.

Direct Connection warranties do not apply to parts installed on a vehicle that has had its odometer or emissions systems tampered with or disconnected, or that has been declared a total loss by any insurance company, or is rebuilt after being declared a total loss; or is issued a certificate of title indicating that it is designated as "salvage," "junk," "rebuilt" or words of similar import. FCA US LLC will deny warranty coverage without notice if it finds that a vehicle is ineligible for warranty coverage because it has been salvaged or declared a total loss as set forth in this paragraph.

Direct Connection Limited Warranties do not cover any incidental or consequential damages connected with the failure of the part under warranty. Such damages include lost time; inconvenience; the loss of the use of your vehicle; the cost of rental cars, gasoline, telephone, travel or lodging; the loss of personal or commercial property; or the loss of revenue. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

Your warranties can also be restricted by FCA US LLC, as set forth in the New Vehicle Limited Warranty. If your New Vehicle Limited Warranty is restricted by FCA US LLC, coverage under your Direct Connection Parts Limited Warranties may also be restricted or denied.

OTHER TERMS:

To the extent allowed by law, any implied warranties, including any implied warranty of merchantability or fitness for a particular purpose, are limited in duration to the duration of these express warranties. Some states do not allow limitations on how long an implied warranty lasts, so the above limitations may not apply to you. These warranties are the only express warranties made by FCA US LLC for Direct Connection Parts. Except where prohibited by law, this warranty is the sole and exclusive remedy. No person, including a dealer or employee of FCA US LLC, has the authority to vary or change these warranties. Michigan law governs this warranty to the extent allowed by law. Interpretation of the terms of this warranty must be done using Michigan law. These limited warranties give you specific legal rights and you may also have other rights which vary from state to state.

MOPAR® POWERTRAIN WARRANTY PROCESS

DEALER SALE TO INDEPENDENT REPAIR FACILITY

- 1 Customer returns to the independent repair facility with a warranty concern.
- 2 Independent repair facility will call the Powertrain Service Center (PTSC) at: (866) 262-8517 for repair/replace authorization.

NOTE: If the registration is not found on DealerCONNECT and customer can provide a copy of the warranty or original repair invoice, dealer or PTSC must enter original warranty registration on DealerCONNECT. Warranty coverage will not be honored if the warranty registration is not verifiable.

ONE OF TWO SCENARIOS MAY OCCUR:

SCENARIO I: PTSC determines that the independent repair facility can perform published diagnostic procedures.

- 1 PTSC diagnoses concern and authorizes the independent repair facility to repair or replace the part.
- 2 PTSC faxes dealer the authorization form.
- 3 Prior to sending the replacement unit to the independent repair facility, the dealer will remove the three-part adhesive label (containing serial number and part number of replacement unit) from outside packaging and place a label on each copy of repair order (customer copy, dealer copy and registration document).
- 4 Independent repair facility repairs or replaces part in customer's vehicle.
- 5 Independent repair facility returns vehicle to customer at no charge.
- 6 Independent repair facility submits detailed commercial invoice to dealer along with the failed part or assembly.
- 7 Dealer submits WRO to FCA US LLC and reimburses independent repair facility for the labor amount.
- 8 Dealer updates warranty registration as a subsequent repair/replacement on DealerCONNECT with the serial number of the replacement assembly and new installation date.

SCENARIO II: PTSC determines that independent repair facility cannot perform published diagnostic procedures. It is recommended by the PTSC to take the vehicle to the dealership for additional diagnosis.

- 1 Dealer performs diagnosis.
- 2 Concern is covered by the Mopar® 3/100 Powertrain Parts Warranty (if not, advise customer the concern is non-warrantable):
 - a. Dealer repairs or replaces as necessary
 - b. Dealer removes three-part adhesive label (containing serial number and part number of replacement unit) from outside packaging and places a label on each copy of repair order (customer copy, dealer copy and registration document)
 - c. Dealer returns vehicle to customer at no charge
 - d. Dealer submits WRO to FCA US LLC
 - e. Dealer updates warranty registration as subsequent repair/replacement on DealerCONNECT with the serial number of the replacement assembly and new installation date

TOWING

Attach a copy of the detailed commercial invoice to the dealer from the independent repair facility for the preapproved labor amount. If any towing charges were incurred (not to exceed \$75.00 allowance), attach a copy of the towing invoice to the repair order.

Every towing invoice must include:

- Vehicle's VIN
- Mileage
- Date of tow

NOTE: Powertrain components purchased in the United States and installed on Canada or Mexico market vehicles do not receive the applicable Powertrain Warranty, with the exception of travelers from Canada or Mexico with proof of registration. These travelers can receive warranty coverage through a U.S. dealer. U.S. dealers are not allowed to register powertrain components on Canadian or Mexican registered vehicles. Powertrain components sold to businesses in Canada or Mexico for the purpose of resale do not receive the applicable Powertrain Warranty. International purchases made online are not covered.

STELLANTIS NORTH AMERICAN CORE RETURN GUIDE

POLICES AND PROCEDURES, ALL IN ONE PLACE.

CORE RETURN

Cores are the lifeblood of any viable remanufacturing program. The timely return of cores using the proper packaging and handling methods is key to providing our vehicle owners with a low-cost and sustainable option to keep their vehicles on the road.

Proper use of the Stellantis/SUSTAINera core return system ensures that genuine Mopar® Parts returns are used to provide high-quality remanufactured parts and prohibits cores getting into the salvage and aftermarket competitor space.

NO-HASSLE CORE RETURNS!

REMANUFACTURED AND FASCIA DEPOSIT PARTS CORE RETURN POLICY

Core Return and Credit Eligibility

1. Only those parts with an active core part number offered on the Mopar® Remanufactured OE Deposit Parts program are eligible for return and credit.
2. Only cores generated by the purchase and sale of Mopar Remanufactured OE Deposit Parts are eligible for return to Stellantis for exchange credit on a one-for-one replacement basis. The quantity of cores received from a dealer cannot exceed the quantity of Mopar Remanufactured Parts purchased.
3. Cores that result from dealer-to-dealer sales must have eligibility transferred in the Global Core Return System — screen GCRN.
4. Stellantis may chargeback dealers for credit paid on disassembled or incomplete cores.
5. Stellantis may take other actions as necessary if the core return policy is not followed.
6. Cores are eligible for return up to two years after the date of purchase.

Core Return Requirements and Acceptability of Cores

1. Stellantis has a “No Hassle” core return policy for engines, transmissions/transaxles, transfer cases, starters, alternators, powertrain control modules and brake calipers. This includes catastrophic failure and damage due to transportation during shipment.
2. Returned cores must be drained completely, fully assembled and complete with the same components provided with the replacement Mopar Remanufactured OE Deposit Part.
3. Reduced or no credit will be paid for disassembled or incomplete cores.
4. All cores must be returned in the box or crate in which the replacement Mopar Remanufactured part was shipped.

Fascia Core Return

1. There is a core deposit value on eligible fascia cores. Damaged front and rear fascias replaced on model year 2010 and newer Stellantis vehicles should be returned to the Mopar Parts dealer for recycling.
2. Original packaging is not required.
3. Mopar fascia cores become eligible for a core deposit refund when a 2010 or newer Mopar fascia is purchased from an Stellantis dealer on a one-for-one replacement basis. The quantity of cores returned cannot exceed the quantity of Mopar fascias purchased.
4. If a fascia core is not returned within 15 months, the deposit may expire and no longer be redeemed.

By simply following the guidelines listed above, you can receive 100% core credit using the Mopar hassle-free core return process. Mopar makes it easy!

ALUMINUM WHEELS DEPOSIT PARTS RETURN POLICY

In alliance with our Dare Forward 2030 and Circular Economy (CE) plan within Stellantis and Mopar®, we continue this momentum with the addition of Aluminum Wheel Recycling.

Recycling of aluminum and recovering this material to complete a closed loop process with our manufacturing plants is key in the elimination of waste and part of our global strategy within Circular Economy.

From November 1, 2023, forward there will be a deposit charge of \$50.00 added to aluminum wheel purchases.

The process to return aluminum wheels and receive the deposit credit back will be folded into the existing dealer return process for fascias.

DO NOT SEND WHEEL RETURNS BACK VIA DDS DELIVERY!

Failure to follow the above will result in delayed or no credit back.

Program available in US only at this time.

**Any questions concerning core returns should be directed to the GCRS Customer Service:
DealerCONNECT > Parts > Contact Global Core Returns (preferred) or 866-254-2940.**

HEADLAMP DEPOSIT PARTS RETURN POLICY

In alliance with our Dare Forward 2030 and Circular Economy (CE) plan within Stellantis and Mopar, we continue this momentum with the addition of Headlamp remanufacturing.

From December 1, 2023, forward there will be a deposit charge of \$120.00 added to select headlamp purchases.

Program available in US and Canada only at this time.

THE HEADLAMP CORE RETURN PROCESS

The process to return headlamps and receive the deposit credit back is the same core return process for returning mechanical parts back to your facing Depot – return via normal DDS with other mechanical cores.

Failure to follow the above will result in delayed or no credit back.

FAQs

Why am I being charged a deposit for these?

We are remanufacturing headlamp assemblies and need the material to seed this process. New glass will be used on the remanufactured headlamps.

Will Mopar be putting Deposit Part Stickers on pre-existing stock?

We are working on putting Deposit Part labels on as much as possible, but not all stock will have the deposit label present. You can order roll of Deposit Labels direct from printer: moparlabels@rrd.com

How do I return the core?

Return via normal DDS with other mechanical cores.

Is the original box required?

Yes, please make every effort to return in the original OE Box that the new headlamp was delivered in.

What do I do if the original box is missing/destroyed?

Please put in suitable replacement packaging and include a note inside “original box damaged/destroyed.”

What if the lamp is an aftermarket lamp?

Since you are replacing it with an OE headlamp the aftermarket return will be accepted back under the part number ordered.

What if the lamp is missing? How will I get my core recovery?

If the lamp is missing due to accident, then a supplemental claim needs to be filed with the insurance company for the core recovery.

What if the lamp / lens is broken/scratched/damaged?

Return what you have of the assembly; there is no need to return loose broken glass pieces.

What if the lamp is completely crushed and in pieces?

Return what you have of the assembly; there is no need to return loose broken glass pieces.

DRAINING POLICY

In keeping with our continuing “Be Green” efforts, it is important that you review our Powertrain Core Return Policies. The procedure to properly drain engine and transmission core units prior to shipping back to Mopar® is outlined below.

One of the Most Common Chargeback Reasons is “Improperly Drained” Parts

Global Core Acceptance Standards are inserted in all Reman units shipped and are referenced in the back of the Reman catalog. This standard outlines the fact that all cores must be drained of fluid or a chargeback of \$75 per core will be assessed.

All Core Returns Must Be Properly Drained

Adherence to this policy is necessary to protect the environment and comply with environmental regulations. Our drivers have been instructed to pick up only drained cores.

Draining Guidelines

All assemblies should be drained on a curbed, coated or lined concrete surface with spill controls, including drip pans and absorbents where necessary. If the draining area is outdoors, it should be covered to prevent rainwater from collecting and prevent contaminated run-off from polluting rain and melting snow. Always ensure that you use a funnel to drain fluids directly into an appropriate storage container for proper disposal in compliance with all local environmental standards.

Transmissions

Drain transmissions by removing both the pan and drain plug. Drain the torque converter separately by tipping at various angles to remove fluid from the hub. Replace the torque converter, pan and plug after draining. Insert the dipstick in the transmission and tighten all bolts on the oil pan to prevent any residual fluid from leaking.

Engines

Drain engine oil by removing the plug and allowing sufficient time to drain fluid. Insert the dipstick in the engine and tighten all bolts and plugs to prevent any residual fluid from leaking.

Chargeback Criteria

Dealers will be assessed a \$75 (per core) chargeback fee for improperly drained part returns. Cores that are received in fluid-soaked containers or with visible leakage will incur this chargeback. Cores receiving a chargeback will be documented and photographed.

By simply following the guidelines listed above, you can receive 100% core credit using the Mopar hassle-free core return process. Mopar makes it easy!

CATALYTIC CONVERTER CORE RETURN STANDARDS

- Catalytic converters must be intact, and all pipes must be completely removed prior to return (as shown)
- Mopar® will reimburse only 50% of the core/deposit on returns that do not comply with the above requirement
- Exception: All catalytic converters returned for quality requests to the Quality Engineering Center must be returned in their original condition (no pipes removed)
- To ensure everyone's safety, please tape ends that were cut (w/ duct/packing tape) to avoid any potential injuries during handling

By simply following the guidelines listed above, you can receive 100% core credit using the Mopar hassle-free core return process. Mopar makes it easy!

CORE RETURN PROCEDURE NOTES

Stage the Core for Pickup

- Pack the core in the original container
- Insert the printed Core Return Control Ticket into the Core Material Return Envelope (Part# 00PM1262)
- Attach the Core Material Return Envelope to the container

NOTE: Please pack only one core and one Core Return Control Ticket per container. Cores not packaged according to the Mopar® Core Return Policy may be subject to a 100% chargeback.

Dedicated Delivery Service (DDS)/Carrier Pickup Provisions

- The DDS/carrier will only pick up cores that have been assigned to the Dealer Shipper Document
- Non-DDS dealers should follow the procedures explained in the FAQ document for returning cores
- Submit the following documents to the DDS/carrier driver: Two copies of the Dealer Shipper Document for the dealer to sign — keep one for your records

Dealer Credit Process

- The dealer credit process is finalized when the core is received at a Mopar facility
- The dealer credit will appear on the Dealer's Weekly Statement
- Core returns are subject to audit and full chargeback for up to 90 days after receipt at the Mopar facility
- GCRS issues a one-time part credit
- Enhanced credit information is printed on the Dealer Credit Memorandum, including Core Return Control Ticket Number, date and core part number

Other Screens Available

- View Dealer Sales: View sales to other dealers from you that have been processed through GCRS
- Part Inquiry: View part detail including description, control level, eligibility, in demand quantity, core value and effective date
- Dealer List: Search for a dealer code by dealer name. This is used for dealer-to-dealer sales

By simply following the guidelines above, you can receive 100% core credit using Mopar's hassle-free core return process. Please refer to your Remanufactured Parts Catalog for further information on the return guidelines and acceptance standards. Any questions concerning core returns should be directed to the GCRS hotline: 866-254-2940. Assistance is available.

Any questions concerning core returns should be directed to the GCRS Customer Service: DealerCONNECT > Parts > Contact Global Core Returns (preferred) or 866-254-2940.

GLOBAL CORE RETURN SYSTEM (GCRS) PROCESS

1. DEALERSHIP

- Process the Core Return/Deposit Part in the Global Core Return System (GCRS)
- Attach Appropriate Bar Codes to the Parts You are Returning

2. DEDICATED DELIVERY SERVICE (DDS)

- Scan Bar Codes of Parts and Issue Credit to Dealer
- Transport Parts to Part Distribution Center (PDC)

3. AER/FRED JONES — NATIONAL CORE PICKUP PROGRAM

- \$100 Charge for Gasoline Engines
- \$125 Charge for Diesel Engines
- Contact AER for Details at 800-348-3673

4. PDCs

- Unload Cores from Trucks
- Sort the Returns and Scan into Bins
- Cross Dock

5. COMMON CARRIER

- Transport Cores/Deposit Parts to the Memphis Core Center (MCC)

6. MEMPHIS CORE CENTER

- At the MCC, Trucks are Unloaded
- Returns are Sorted and Scanned for a Receipt
- Parts are Inspected for Damage
- If Necessary, a Chargeback is Issued, and the Part is Returned to the Dealer
- Inventory is Stored at the MCC for Future Remanufacturing
- As Orders are Received, the MCC Fulfills and Ships Orders to Suppliers

7. COMMON CARRIER

- A Common Carrier Transports Cores to Supplier

8. SUPPLIER

- Trucks are Unloaded at Supplier
- Cores are Sorted by Part Number
- Cores are Inspected for Damage and Inventoried
- Cores are Used to Remanufacture Parts
- Finished Products are Shipped to Mopar® PDC

9. PDC

- Dealer Orders Parts
- PDC Fulfills Order — Ships and Delivers
- Dealer is Invoiced, which Generates Eligibility

FREQUENTLY ASKED QUESTIONS (FAQ)

1. How do I find a core return that I have entered?

When entering the core for return, make note of the Control Ticket Tracking Number (e.g., C123456789). The message “Press Tracking Summary” will appear at the top of the screen after entering core return. Control Ticket Tracking Numbers can be located by selecting “Tracking Summary” and searching by part number.

Select the *Print/Cancel/Dealer Sales* tab, enter the date the core was entered for return and select “Search.”

2. I entered a core for return. How do I locate the paperwork?

Bar codes and Dealer Shipper Documents need to be printed from DealerCONNECT. Select the *Print/Cancel/Dealer Sales* tab, change the drop-down date to the date the core was entered for return and select “Search.” Bar codes are identified as C123456789 and Dealer Shipper Documents are identified as GCRSSHP #2020-31-07.

3. I entered a core for return yesterday and now I don’t have eligibility. Will you re-instate it so I can enter the return?

No need to re-instate. In the *Print/Cancel/Dealer Sales* tab, change the date to yesterday’s date and click search. Your return should appear. If not, please contact GCRS Customer Service for assistance.

4. Why can’t I find the core I entered for return in the Print screen?

Make certain the core was assigned for pickup. After assigning the core, wait until the next half hour to print paperwork. For example, if a core was assigned for pickup at 11:04 a.m., wait until 11:30 a.m. to print the paperwork.

5. How do I cancel a core return?

Dealers can cancel core returns by selecting the *Print/Cancel/Dealer Sales* tab and selecting the *Cancel Returns* sub-tab. Locate the tracking number, part number and date needed to be canceled, and select the box for that item on the left. Next, select “Cancel” at the bottom of the screen. A message will appear “Are you sure you want to Cancel Pending return(s)?” Select “Yes” and the return will be canceled. Core eligibility will be restored on that part number.

6. How do I dispute a chargeback I received on a core return?

For a “Wrong Part Returned” chargeback – 60-A, please call GCRS Customer Service at 866-254-2940 for assistance. If requested, a digital picture of the part returned to the Memphis Core Center (MCC) will be forwarded to the dealer.

To avoid chargebacks for an incorrect part returned, audit outbound boxes to ensure the part is associated with its corresponding control ticket.

For a “Disassembled” chargeback, please call GCRS Customer Service at 866-254-2940 for assistance. If requested, a digital picture of the part returned to the Memphis Core Center will be forwarded to the dealer.

Try to reassemble to the best of your ability. If the part is left disassembled because internal parts are too damaged to reassemble, place a note inside the box/tote with an explanation (be sure to state that you tried to reassemble). The inspectors at the MCC will verify and process accordingly. If you still receive a chargeback, please call the number above.

Please be aware that if you receive a chargeback on a return that was held for an extended period of time before shipping, GCRS Customer Service will request a Dealer Shipper Document showing the ship date. It is possible that your chargeback reversal request may be denied if you do not ship your parts within a few days of entering them for return.

7. In the tracking screen, the core I returned says “Canceled by Dealer,” but I returned the core. Now what?

If the entry is canceled, the dealer will not receive credit. By canceling the return, your dealership is stating that said entry was a mistake. The tracking history in GCRS is no longer available on that control ticket.

When a dealer cancels a core return, eligibility on that part is restored.

8. What is the part number to return an empty container?

The part number for a returnable container is UCONTRET00. Last two digits must be zero, zero (00).

9. How do I reorder more Core Return Envelopes?

Core return envelopes can be ordered with a daily parts order, using part no. 00PM1262.

10. How do I transfer core eligibility to another dealer?

To transfer Core eligibility:

Parts > Global Core Returns > Print/Cancel Dealer Sales > Enter Dealer Code (or search by Dealer name > Enter part number (use U if transferring R part) > Search > Next screen CONFIRM part # and Qty > Submit

To view transfer activity to and from dealers:

Parts > Global Core Returns > Core/Tracking Inquiry > View Dealer Sales > Select Sales to or Purchases from > Search - Will show activity to or from for past year

As a reminder, it is up to the buying dealer to ensure the selling dealer transfers the return eligibility at the time of an over-the-counter purchase as Stellantis would have no knowledge of this transaction occurring.

11. Do I need to manually transfer eligibility for parts sold via 5300 order?

No. The GCRS system will transfer eligibility systematically.

12. Why haven't I received eligibility on a Reman part I just purchased?

Wait a couple of days after the purchase for the eligibility to reach the system. If the dealer hasn't received eligibility at time of invoice, call GCRS Customer Service at 866-254-2940 for assistance.

13. How do I receive credit on a core I returned over 60 days ago?

Email a copy of the Dealer Shipper Document (DSD) to: coregrp@stellantis.com. The GCRS Customer Service keeps track of monthly manual credit requests from dealers. The pickup date on the DSD **must be over 60 days** to receive manual credit.

14. How do I retrieve a part I returned by mistake?

Request the facing PDC to locate the part if it was returned less than one week ago. **If the facing PDC is not able to find the part, this part will go to the final destination and not be returned to the dealer.**

15. What is the difference between a Core PGM Referral and Mandatory Warranty return?

Cores are to be returned using the Global Core Return System under the Core PGM tab if the part was used on a warranty job but is not being called back as a mandatory return for inspection.

Cores are to be returned using the **Part Return Analysis System+ (PRAS+)** section of DealerCONNECT if the part is being called back as a mandatory return for inspection. Core credit is built into the barcode used for the return. There is no need to apply for separate core credit in the Global Core Return System.

16. My dealership merged with another dealership, but I don't have eligibility for their inventory that was purchased in the sale. What do I need to do? (Buy-Sell)

Contact GCRS Customer Service to verify the buy-sell. Eligibility will be transferred from the old dealer code to the new dealer code.

17. I am a Non-DDS Dealer, how do I correctly return parts?

Dealer Route	< 150lbs, 130" girth	≥ 150lbs, 130" girth	Former HazMat***
DDS (mainland US)	DDS to Facing PDC	DDS to Facing PDC	DDS to Facing PDC
Non-DDS (mainland US) including Interline	Ground UPS to Memphis Core Center* UPS Acct#W888F9	LTL to Facing PDC** (use route inbound LTL carrier)	Contact GCRS Hotline for instruction: 866-254-2940
Offshore US** Alaska, Hawaii, Puerto Rico	Contact BAX representative Contact Eagle representative	Contact BAX representative Contact Eagle representative	Contact GCRS Hotline for instruction: 866-254-2940

* The UPS account may ONLY be used for non-DDS dealers shipping ground direct to the Memphis Core Center. All other uses will be cross-charged to the dealer account.

** The Logistics Provider will determine the most economical transportation method.

*** Former HazMat is considered any core that was originally received as a HazMat part.

These policies only apply to returned core material, program and non-program. Cycle Returns and MRAs should continue to be returned to the facing PDC. Questions or clarification regarding these policies should be directed to the Mopar GCRS Hotline: 866-254-2940.

SECTION 5: MOPAR VS. THE COMPETITION

Make Aftermarket An Afterthought.

Our reputation is galvanized

In laboratory corrosion tests, Mopar® subjected a Mopar O.E. fender to the same 12-week cyclical corrosion test as an aftermarket fender. The results were staggering. Both fenders were scratched and then static salt sprays were applied three times per week to simulate five years of exposure to the snow, humidity and salt fog you'd find in Halifax, Nova Scotia. Twelve weeks of testing under these extreme conditions is the equivalent of five years of real-world elemental damage.

MOPAR FENDER

- Material - Galvanized steel
- Pretreatment Coating - Zinc phosphate
- Primer - High bake electro deposition

AFTERMARKET FENDER

- Material - Cold rolled steel
- Pretreatment Coating - None
- Primer - Refinish primer

NOTE: Ruler (as seen in photos) used as visual comparison to show scale/size, not to show measurement.

THE RESULTS:

MOPAR FENDER

- Minimal corrosion creepback
- Limited corrosion run-out
- No rust through

AFTERMARKET FENDER

- Excessive corrosion creepback
- Long corrosion run-out
- Deterioration at panel edges

Performance You Can Trust.

Mopar® Collision Parts always outperform the aftermarket for fit, finish and performance. Only authentic Mopar parts are made to propriety standards, using the best materials and manufacturing processes, to guarantee the right fit the first time. In side-by-side testing, Mopar fenders outperformed aftermarket fenders in the following: corrosion testing, dimensional accuracy testing and packaging comparisons.

MOPAR FENDER

100+ days after testing completion

AFTERMARKET FENDER

100+ days after testing completion

Dimensional Testing.

DIMENSIONAL ACCURACY TESTING OF AFTERMARKET FENDERS

Mopar[®] subjected two aftermarket fenders to dimensional testing, comparing them to Mopar design specifications. The aftermarket fenders were measured by a Coordinate Measuring Machine (CMM) using a touch probe, taking three-dimensional measurements at key points. Next, they were subjected to ATOS white light scans, which showed deviations from FCA US LLC design specifications as indicated by color. **Green is optimal**, dark blue areas are lower than spec, dark red areas are higher than spec. With the high degree of deviation shown, these aftermarket fenders would require extensive adjustment for an acceptable appearance, proper fit and finish.

Optimal Fender

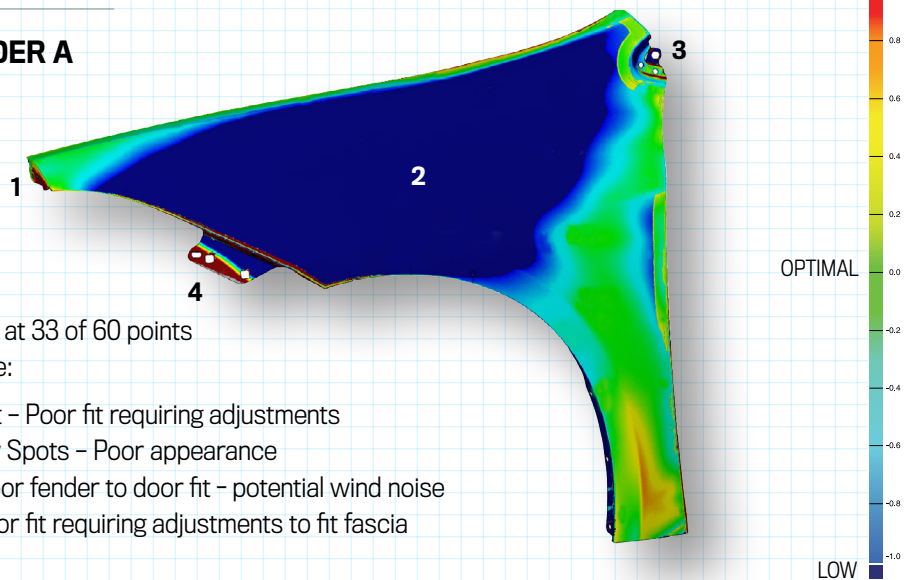

Dodge Dart

Failure To Fit.

AFTERMARKET DIMENSIONAL INACCURACY - WHITE LIGHT SCAN

AFTERMARKET FENDER A

Dimensional standards failed at 33 of 60 points checked – a 56% Failure Rate:

1. Upper Fender Attachment – Poor fit requiring adjustments
2. Upper Half of Fender Low Spots – Poor appearance
3. Upper Mounting Hole – Poor fender to door fit – potential wind noise
4. Attachment Tab High – Poor fit requiring adjustments to fit fascia

AFTERMARKET FENDER B

Dimensional standards failed at 35 of 60 points checked – a 58% Failure Rate:

1. Upper Fender Attachment – Poor fit requiring adjustments
2. Upper Half of Fender Low Spots – Poor/wavy appearance
3. Catwalk (Upper Edge) – Poor hood to fender fit
4. Upper Mounting Hole – Poor fender to door fit – potential wind noise
5. Attachment Tab High – Poor fit requiring adjustments to fit fascia

SUMMARY:

With the high degree of deviations from FCA US LLC specifications, these fenders would require extensive rework for acceptable appearance, proper fit and finish.

CHOOSE MOPAR. PARTS FOR PROTECTION YOU CAN TRUST

Packed To Perform.

Here's our wrap on packaging

Mopar® packaging specifications require parts to be secure and completely protected to ensure the dimensional accuracy of every part.

Even if the aftermarket fender offered accurate dimensions, which reverse engineering and substandard materials and processes won't allow, aftermarket packaging is not designed to adequately protect the part during shipping and delivery.

The results are clear. Only authentic Mopar Collision Parts offer factory-engineered fit, finish and performance in every part we sell. Always get the Mopar Difference. Ask for Protection you can trust – Mopar.

Save time, money and your reputation: Insist on authentic Mopar sheet metal parts.

PACKAGING COMPARISON

MOPAR PACKAGING

- Fully secured contents, no exposed product
- Strong, double-wall corrugated cardboard
- Foam padding and bubble wrap protects surfaces*
- Clear Mopar brand and handling instructions
- Orientation arrows and hand holes for safe lifting
- Guaranteed satisfaction

*For larger parts, such as hoods, an elastic band system is used to keep high-density EPP pads in place to protect crucial points during shipping.

AFTERMARKET PACKAGING

Aftermarket Fender

- Not secure
- Thin gauge cardboard
- Exposed areas
- Banker's Box string

MOPAR® CHEMICALS, FLUIDS AND LUBRICANTS

Transmission Fluids

Mopar® Transmission Fluids help reduce formation of deposits and ensure smooth, quiet operation.

- ▶ 8 & 9 Speed ATF
- ▶ ATF+4
- ▶ SP-IV ATF
- ▶ ASRC ATF
- ▶ CVTF+4
- ▶ MB236.12 ATF
- ▶ DEXRON®-VI ATF

Most available by the quart, gallon or pallet

Brake Cleaner

Removes oil, grease and brake fluid residue from all metal brake parts. Loosens brake dust for easy removal. Non-chlorinated and non-chlorinated low-VOC formulas available.

Available in 15 Oz. aerosol can and drums
Half Pallet (432 Cans)
Full Pallet (864 Cans)

Antifreeze/Coolant

Ethylene glycol-based formulation prevents freeze-up and boil-over while inhibiting corrosion. Only for vehicles factory-filled with specified fluid – do not mix fluids. Concentrate and prediluted formulas available.

Formulas & Color

- 3-Year Formula – **Green** – IAT
- 5-Year Extended Life Formula – **Green** – POAT
- 5-Year/100,000-Mile Formula – **Orange** – HOAT
- 10-Year/150,000-Mile Formula – **Purple** – OAT

Diesel Exhaust Fluid

Federal emission standards for many diesel vehicles, including all 2011 and later Ram 3500/4500/5500 diesels, require DEF to operate. DEF is carried in a separate tank on board the vehicle and injected into the exhaust system. DEF consumption is expected to be approximately 2% of fuel consumption.

Available by gallons and by drums

Cooling System Flush

Dissolves oil and sludge from cooling system while removing scale and rust from components. Does not foam and is compatible with all aluminum components.

Available in 22 Oz. bottles

Refrigerant

R-134A A/C REFRIGERANT

Convenient 30 lb. cylinder nonreturnable container.

1234YF A/C REFRIGERANT

New air conditioning refrigerant for use in vehicles equipped with the 1234YF systems.

2 YEAR
UNLIMITED MILES
INCLUDES LABOR
BASIC LIMITED WARRANTY

**WE STAND BEHIND EVERY QUALITY
MOPAR PART WE SELL.**

Peace of mind comes with the 2-Year/Unlimited-Mileage Basic Limited Warranty for Genuine Mopar Parts. The warranty includes up to \$150 labor reimbursement when purchased from an FCA US LLC dealership or authorized Mopar Warehouse Distributor and installed by the professional automotive technicians in your shop.

Certain Mopar Parts continue to feature a Lifetime Limited Warranty. Mopar Powertrain Assemblies (engines, transmissions and transfer cases), for example, are still covered by the Powertrain 3-Year/100,000-Mile Limited Warranty with labor reimbursement.

For more information on specific Mopar Parts warranties, visit:

Mopar® Reman is SUSTAINera Circular Economy.

SUSTAINera Circular Economy. It promises transparent, sustainable and affordable products without compromising quality, while working to preserve the environment through decreased waste and less use of our planet's resources.

POWER UP

SUSTAINera Powertrain Product Lines

SUSTAINera CIRCULAR ECONOMY PARTS

Now, as the technology of new vehicles improves, so does the power behind SUSTAINera Circular Economy Parts. With O.E. validation and manufacturing standards, confidence is engineered into every part.

Gas Engines & Components

- Factory remanufactured and 100% end-of-the-line functional tested to proprietary O.E. standards
- Latest engineering upgrades applied to ensure optimal performance and reliability
- Refurbished O.E. block, heads, crankshaft & rods, built to O.E. specs
- Includes **100% new O.E. parts**

Note: Passenger car and minivan cylinder heads do not include rocker arms or camshaft. Truck, van and SUV cylinder heads are complete except for rocker arms and cylinder head gasket.

Diesel Engines & Components

- Cummins refurbished O.E. block, heads, water pump kits, camshaft & gear, valve cover, oil pan & gear cover built to O.E. specs
- Includes **100% new O.E. parts**

Transmissions & Transaxles

- Factory remanufactured and 100% end-of-the-line functional tested to proprietary O.E. standards
- Latest engineering upgrades applied to ensure optimal performance and reliability
- Rebuild kits are available for our most popular automatic transmissions!
- Includes **100% new O.E. parts**

Torque Converters

- Factory remanufactured and tested to proprietary O.E. standards
- Includes **100% new friction material**
- All lockup-style torque converters are vector balanced and O.E. friction material is bonded in O.E. position

Transfer Cases

- All transfer cases are disassembled and thoroughly cleaned, factory remanufactured and tested to proprietary O.E. standards
- Includes **100% new O.E. parts**

WHOLESALE PRODUCT GUIDE

The Mopar® Wholesale Product Guide is a comprehensive reference of Mopar parts product information.

Add the link below to your mobile device's home screen to access and share content on the go. The guide icon will appear on your home screen. You must have a Wi-Fi or cellular connection to access the guide.

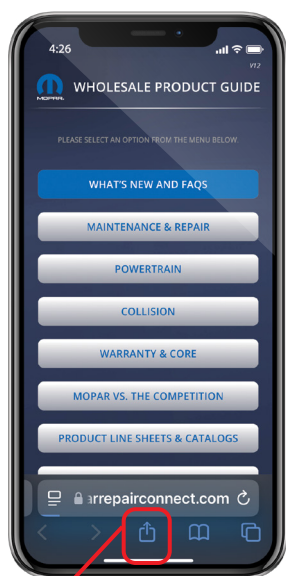

Updates are automatic through the link!

<https://bit.ly/3AgvXfq>

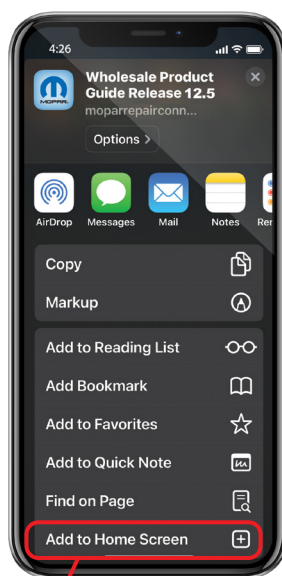

PROCESS 1 – ADD LINK TO HOME SCREEN

iPhone® example: button locations may vary depending on device.

SHARE

Step 1: Type the short URL code into your browser or scan the QR code and click the “Share” button at the bottom of your browser window

ADD TO HOME SCREEN

Step 2: Click the “Add to Home Screen” button

ADD

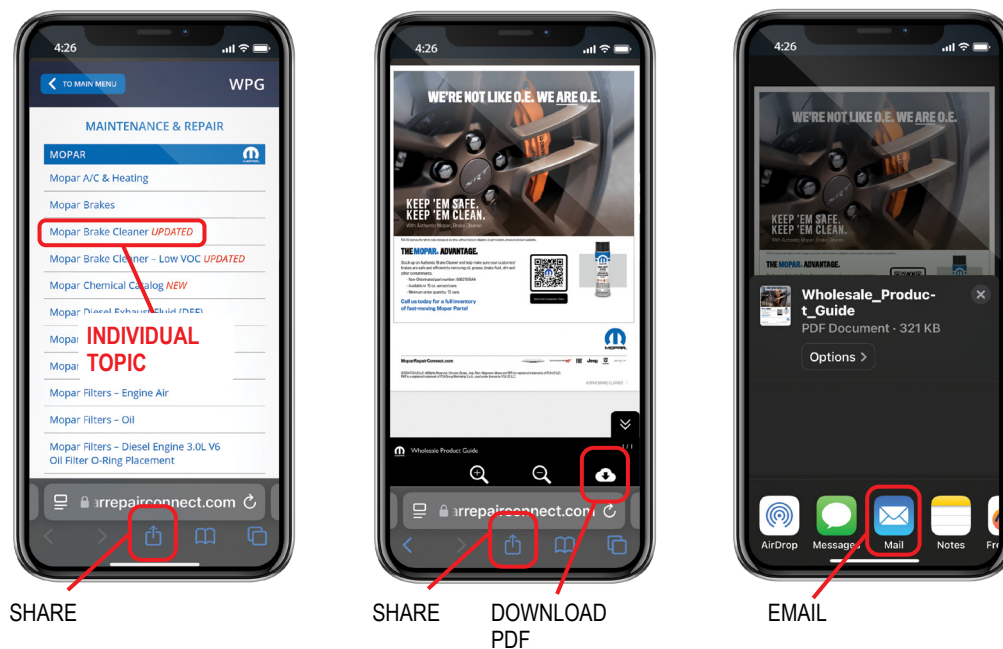

Step 3: Click “Add” to add the link. You may type your own title to name the link or you can accept the title as shown

Step 4: Close your browser

ICON

by pressing the Home button. Locate and click the icon on your Home Screen to open the guide

SHARING AND PRINTING CONTENT

There are two ways to share content from the guide – link sharing or PDF file sharing:

Option 1: Link sharing for digital viewing only

Step 1: Within the guide, click on the link to the content topic you want to share. If the content topic spans multiple pages, all pages will be sent together

Step 2: Click the “Share” button

Step 3: Click the “Email” button. The email window will open. The name of the content you are sharing appears in the subject line. You may type in your own title to name the link or you can accept the title as shown

Option 2: PDF sharing for high-resolution printing

Step 1: Within the guide, click on the link to the content topic you want to share. If the content topic spans multiple pages, all pages will be downloaded together

Step 2: Click the “Download” button

Step 3: Click the “Share” button

Step 4: Click the “Email” button. The email window will open. The name of the content you are sharing appears in the subject line. You may type in your own title to name the link or you can accept the title as shown

Can I download the entire Wholesale Product Guide as a PDF and save it to my device to access later in case I do not have access to Wi-Fi?

- Yes. To save the downloadable pdf to your device, make sure your device settings allow you to download and save content from your browser.

Does the guide work on iPhones® and Android™ devices?

- Yes.

Do I need Wi-Fi?

- If you are accessing the guide through a link saved on your home screen, you do need Wi-Fi. However, you do not need Wi-Fi if you downloaded the PDF to your device for access through iBooks.

How do I get an updated guide?

- If you saved the link to your device's home screen, it will update automatically. If you downloaded the PDF to your iBooks, you will need to re-download the updated file. You will receive an email notification from the Mopar® Wholesale Support team advising that an update has been published with the file link for downloading.

Can I link to the Dealer Site from the guide?

- No.

How do I get back to the main menu?

- Click the "TO MAIN MENU" button at the top of the app to go back to the main menu.

How do I navigate between pages?

- If you want to go back to other pages within the guide, click the "Browser" tab button and it will bring up all your open tabs pages.

Can I share and send entire sections or just individual pages?

- You can send entire sections and individual pages – your choice! Click on the Complete Section link to send the full section or click the "Share" button to send the page of content you're on. When sending a content topic that spans multiple pages, all related pages will be sent.

The flyer I printed is blurry – how can I print in high-resolution?

- If the flyer appears blurry when printed, check to make sure you aren't printing from a shared HTML link. For high-resolution printing, be sure to download the PDF first before sharing or printing.
